### **Nutrigenomics and Health - from Vision to Food**

Vedlagt fremsendes 30 eksemplar af 1st announcement for levnedsmiddelkongressen i 2006 "Nutrigenomics and Health - from Vision to Food", som finder sted den 15. - 16. marts 2006 på Den Kgl. Veterinær- og Landbohøjskole.

1st announcement kan downloades fra hjemmeside [www.lmccongress.dk](http://www.lmccongress.dk), hvor også programmet kan findes. Dette vil løbende blive opdateret.

1st announcement bedes venligst fordelt til medlemmerne af Udvalget for Videnskab og Teknologi. Skulle der være brug for flere eksemplarer, kontakt mig da venligst. På forhånd tak.

Venlig hilsen

Kirstine Dal

## Nutrigenomics and Health – from Vision to Food

Centre for Advanced Food Studies is pleased to announce that the LMC International Food Congress 2006: *Nutrigenomics and Health – from Vision to Food*, will take place at the Royal Veterinary and Agricultural University, Denmark, March 15-16, 2006.

Presentations on day one of the congress will explore topics within the field of *Nutrigenomics, Markers and Health*.

The programme on day two will address topics within the field of *Nutrigenomics and New Food*.

Some of the world's most prestigious scientists and representatives from industry within the area of nutrigenomics will present their latest research.

*Nutrigenomics and Health – from Vision to Food*, is the overall theme of the congress, which aims to disseminate the latest research, innovations and visions within the area.

The congress will bring together scientists and representatives from industry from all over the world, to meet, network and discuss current ideas and possibilities for the future.

### Invited keynote speakers »

Professor Vim Saris, NL »

Dr. Hector Keun, UK »

Dr. Ben Van Ommen, NL »

Chief Science Officer Peter Olesen, DK »

Professor Adrian Tsang, CA »

Professor J. Bruce German, USA »

Professor Terry Graham, CA »

Professor Arne Astrup, DK »

Professor Peter Sandøe, DK »

Associate Professor Jennifer Wan, HK »

## Nutrigenomics and Health | From Vision to Food LMC International Food Congress 2006

The congress will include: Plenary sessions, parallel sessions and a poster session.

The **plenary sessions** will comprise lectures given by internationally respected scientists who have been invited to present current and future research and ideas within areas such as nutrigenomics and the obesity problem, bioinformatics, the industry's expectations to nutrigenomics in relation to consumer health, systems biology in Chinese nutrition and medicine, visions for nutrigenomics, and pertinent ethical aspects.

The **parallel sessions** will be comprised of in-depth lectures by international experts within current topics of nutrigenomics. Each session will be opened by an invited scientist of high international status.

The focus in sessions 3 and 6 will primarily be applied research. Sessions 1, 2, 4 and 5 will focus predominantly on basic research.

The short lectures will be based on selected submitted abstracts received before November 30, 2005. The abstracts and short papers received from the keynote speakers will be published as a supplement to the *Scandinavian Journal of Food & Nutrition*, March 2006.

To complementing the plenary and parallel sessions a **poster session** entitled *Food and Health* will give a larger number of scientists the opportunity to present their data, giving the congress delegates further opportunity to learn about and explore the many aspects of nutrigenomics.

### » Poster award 2006

The Congress Committee will award the best poster presentation given by a PhD student.

### » General info

For general information and the preliminary programme please visit the congress website at [www.lmccongress.dk](http://www.lmccongress.dk)

### » Overall themes of parallel sessions

- 1 Prevention of lifestyle-related diseases
- 2 Animal models in human nutrition research
- 3 Civilization, ethics and marketing
- 4 Gut, health and immunity
- 5 Food for obesity prevention
- 6 Future foods for health
