# New Tasks, New Tools

Prospects for the European TSOs following the Third Liberalization Package

International Energy Conference, Copenhagen, 12 March 2008

**The Third EU Liberalization Package entails new tasks and new tools for the TSOs in developing the European energy market.**

Energinet.dk is hosting a conference where our present as well as future tasks and challenges will be elucidated. Furthermore, the new terms and conditions of the Third Liberalization Package will be discussed.

Based on specific projects and actions we also illustrate how we handle the responsibilities currently entrusted to the TSOs through national and European legislation.

Through debate and reflection this conference will provide in-depth knowledge of what the future will bring for the European energy market in general and the TSOs in particular.

Energy professionals, market players, authorities, decision makers and others taking interest in the topic are invited to attend this international conference. All presentations will be given in English.

The conference is free of charge and includes lunch and coffee/tea.

# Programme

- 09.30 -** Coffee/tea and  
**10.00** registration
- 10.00 -** Welcome and introduction  
**10.10** Niels Fog, Chairman of the Supervisory Board, Energinet.dk
