To the Danish Government,
To the Foreign Department of the Faroese Government,
To the Faroese Department of Fisheries and Maritime Affairs,

Hereby we protest vehemently against the quasi ritual killing of dolphins at your coast every year at the end of October. We urge you to stop now! that savage anachronism arising from a time that is gone. Moreover, these major crimes on kind living beings are at the same time an infraction against **Article 1 of the EU-Charter** specifying that dignity of man should not be altered! We actually feel our dignity hurt by the cruel activities at your coast that you allow and tolerate at the beginning of the 21 century! We cannot stop boycotting your countries under any possible aspect as long as these unacceptable crimes will last.
