

The University of Copenhagen is pleased to invite you to a Copenhagen Sustainability Lecture with the former President of Maldives, Mohamed Nasheed, who will speak on "How can we build a carbon neutral world economy?"

The lecture will take place on 16 April from 14:00-15:00 at the Faculty of Science, Auditorium A2.70.04, Thorvaldsensvej 40, building 2-70, 1871 Frederiksberg C.

In this lecture, Mohamed Nasheed will outline the dangers climate change poses to his low-lying island nation, which stands just 1.5 meters above sea level.

Mohamed Nasheed served as the Maldives' first democratically elected president and is a respected international campaigner on climate change.

Read more about the lecture in the attached announcement and sign up here:
