

Dear Ms. Klint,

We have received a letter from the Chamber of Deputies of the Parliament of the Czech Republic asking for a possibility to have consultations in Denmark.

The members of the Health Committee will be very pleased to meet its Danish partners in Folketing to exchange views about financing and organization of the health sector. Some other topics such as legislation, insurance, research etc. are subjects of their interest either.

Therefore, the Czech Deputies have an idea to have also a meeting at the Ministry of Health, as well as with representatives of insurance companies, large national and smaller regional hospitals.

The most convenient time is at the end of November 2014.

I would greatly appreciate your opinion on this proposal. I am convinced that the visit would be useful for both sides.

Yours sincerely

Miroslav Čančík
