Dear Mr Brigadegeneral Claus Uttrup

3hf foundation Switzerland has been in touch with you earlier concerning taking over buildings in Grønnedal with a new use of the area. After having visited the location in September with Malik Papis, our representative in Greenland, we can confirm that we are still very interested in being established in Grønnedal. But we need some time to develop the project, involve others and organize the financial part. Establishing a daughter foundation in Greenland is already in process, because we have been informed by the government of Greenland that this is a necessity.

We would like to have information about the energy consumption in Grønnedal for light, streetlight and heating in different parts in Grønnedal such as the station area and the "halv-tolv" area in the last few years back.

We are very sad to experience that all furniture and equipment has been moved away. This will cost us a lot more to replace everything.

We are confident to be able to arrange everything in a suitable way and with benefits for everybody.

Kind Regards

Hansjürg Hess,
3hf foundation Switzerland
