

INVITATION

European release of the World Energy Council's 2014 World Energy Trilemma Report

The World Energy Trilemma Report assesses how efficiently countries' policies are managing the energy trilemma: how to deliver energy securely, to mitigate the environmental impact of energy production and use, and to ensure energy is available to all and at an affordable price.

The report includes the world's most comprehensive ranking of countries energy policies and identifies areas of success and highlights aspects for improvement.

This year's report also provides the backbone to the WEC's on-going dialog between industry and policymakers presenting the views of 50 energy and environment ministers, along with the views of multilateral development banks, IGO's and experts from 25 countries.

We invite you to the presentation of the findings of this year's report and discuss the impact for industry and policymakers.

The report's world release will take place in National Press Club, Washington, USA, on November 24, 2014, in cooperation between World Energy Council and its U.S. member committee, United States Energy Association.

The meeting is free for members of DI Energy and WEC Denmark. Otherwise the fee is DKK 1.000¹

PROGRAMME

Time

Monday 01 December 2014
14:30 - 17:00

Venue

House of Industry
H.C. Andersens Boulevard 18
1553 Copenhagen V

Registration

Please register by sending an e-mail to kontakt@wec-danmark.dk
