About GGGI

GGGI was founded to support and promote green growth by targeting key aspects of economic performance such as poverty reduction, job creation, social inclusion and environmental sustainability.

Headquartered in Seoul, Republic of Korea, GGGI also has representation in a number of partner countries.

Member countries:

Australia, Cambodia, Costa Rica, Denmark, Ethiopia, Fiji, Guyana, Hungary, Indonesia, Jordan, Kiribati, Republic of Korea, Mexico, Mongolia, Norway, Papua New Guinea, Paraguay, Philippines, Qatar, Rwanda, Senegal, Thailand, United Arab Emirates, United Kingdom, Vanuatu, Vietnam

Operations:

Cambodia, China, Colombia, Ethiopia, Fiji, India, Indonesia, Jordan, Laos, Mexico, Mongolia, Morocco, Mozambique, Myanmar, Nepal, Peru, Philippines, Rwanda, Senegal, Thailand, Uganda, United Arab Emirates, Vanuatu, Vietnam

Global Green Growth Week 2016

September 5-9, 2016
International Convention Center
Jeju Island, Republic of Korea

Global Green Growth Week 2016

The Global Green Growth Institute (GGGI) will organize the Global Green Growth Week (GGGW2016), on September 5-9, on Jeju Island, Republic of Korea. GGGW2016 will serve to identify practical, innovative solutions to sustainability challenges and strengthen partnerships that deliver growth that is pro-poor, inclusive, and environmentally sustainable.

GGGW2016 will highlight four thematic priorities of energy, water, land-use and green cities that are central to achieving strong, inclusive, and sustainable economic growth.

GGGW2016 will engage high-level officials from government, multilateral development banks and international development agencies, private-sector leaders, and representatives from academia and non-governmental organizations.

GGGW2016 Events

Gathering stakeholders eager to contribute unique sustainability programs, activities, and tools, GGGW2016 will include events designed to strengthen global green growth efforts.

Global Green Growth Summit (GGGS)

The Global Green Growth Summit (GGGS) will address barriers to green growth investments in an effort to increase the flow of financing by examining international financing instruments and assess progress on national financing vehicles that catalyze green growth technology and infrastructure.

Asia Regional Policy Dialogue

Asian Regional Policy Dialogue (ARPD) gathers ministers, experts, and private sector leaders to discuss policy and financing options that address the challenge of transitioning away from inexpensive coal in favor of clean renewables. It is designed to be a solution-oriented dialogue that offers cutting-edge analysis, partnerships, innovative financing, and private sector initiatives that can help countries make green growth a reality. The ARPD will provide an opportunity to shape green energy policy in Asia.

Country Focus Sessions

Country Focus Sessions will showcase more than 30 GGGI projects around the world by welcoming partner countries to highlight green growth milestones and the strategies and action plans that made them possible.

Green Growth Knowledge Platform (GGKP) Annual Conference and GGKP Knowledge Partners Workshop

The 4th Green Growth Knowledge Platform (GGKP) Annual Conference will highlight the latest research and policy considerations affecting pro-poor inclusive growth through plenary sessions, and panel discussions led by noted academics, practitioners and policymakers. GGKP partners will also convene the 3rd GGKP Knowledge Partners Workshop to discuss opportunities for cooperation in green growth knowledge generation and sharing.

GGGI Council and Assembly Sessions

The Fifth Session of the Assembly and Ninth Session of the Council will convene ministers and senior officials from GGGI Member countries to guide GGGI's thematic priorities (water, energy, green cities, and land use), green investment services, and partnerships, as well as to approve GGGI's Work Program and Budget for 2017-2018.

Inclusive Green Growth Partnership (IGGP)

The Inclusive Green Growth Partnership Meeting will bring together heads of the multilateral development banks (World Bank, ADB, AfDB, IDB), United Nations regional commissions (ECA, ECE, ECLAC/CEPAL, ESCAP, ESCWA), and GGGI to strengthen coordination and cooperation aimed at increasing green investment flows in developing and emerging countries.

Launch of the GGGI-NCE Africa Initiative and the Regional Launch of NCE 2016 Report

Welcoming African ministers attending GGGW2016, the GGGI-New Climate Economy (NCE) Initiative will work to support African policymakers navigate the nexus between economic development and climate change.

Club de Madrid (CdM)

The Club de Madrid (CdM) will gather policymakers, academics, private sector representatives and CdM Members for the Democracy in a Sustainable Future workshop that will examine democratic practices offering new opportunities for climate change mitigation and management of natural resources, and generate recommendations on environmental democratic governance.

Green Growth Fair and Technology Exhibit

The Green Growth Fair and Technology Exhibit will facilitate interaction between private and public sector representatives during the entirety of GGGW2016 to explore green growth opportunities and partnerships that leverage respective capacities, resources, and innovations.

Site Visits

Site visits organized by the Jeju Self-Governing Province to showcase the island's renewable energy and related green growth projects.
