

Invitation for the 3rd European Cybersecurity Forum

Dear,

We are pleased to invite you to attend the **3rd European Cybersecurity Forum – CYBERSEC 2017**, which will be held at the ICE Congress Centre in Krakow on **9-10 October 2017**.

CYBERSEC is one of the top five European public policy conferences devoted to the strategic aspects of cyberspace and cybersecurity. Last year's edition gathered more than 700 attendees from all over the world, including politicians, diplomats, experts, business leaders and scientists.

In the light of growing, increasingly complex cyberthreats and challenges, we must seek solutions that constantly strengthen security and amplify international cooperation among cyberspace stakeholders. The resounding success of all previous editions of CYBERSEC testifies to the need for creating an innovative platform to facilitate the development of new ideas and solutions in this field.

Therefore, we would like to invite you to attend this year's edition of CYBERSEC, for which we have planned more than 80 discussion panels, presentations, workshops, and debates about the best-in-class civil, military and business solutions for the European cybersecurity system.

The panellists who have already confirmed their attendance include:

Anna Streżyńska – Minister of Digital Affairs of the Republic of Poland, **Sir Julian King** – European Commissioner for the Security Union, **Melissa Hathaway** – President of Hathaway Global Strategies, LLC and a Senior Advisor at Harvard Kennedy School's Belfer Center as well as Former Cybersecurity Advisor in George W. Bush and Barack Obama administrations, **Michael Chertoff** – Co-founder and Executive Chairman of the Chertoff Group, Former U.S. Secretary of Homeland Security, **Ambassador Sorin Ducaru** – Assistant NATO Secretary General for Emerging Security Challenges, and **Christian-Marc Lifländer** – Head of the NATO Cyber Defence Section.

At CYBERSEC, we team up with world-class experts to encourage decision-makers to take bold political action in cyberspace and think proactively. As our CYBERSEC community is constantly expanding, we believe that many of our ambitious goals are within our reach. It is particularly important to us that not only the speakers, but also the Forum attendees are recognised cybersecurity specialists.

You can register for the event here:
