Den tyrkiske stats angreb på kurdiske styrker må stoppes!

PYD-Danmark fordømmer den tyrkiske stats angreb i Rojava og kalder den danske regering samt de danske partier til handling!

Som de danske medier ligeledes har berettet, så angriber tyrkisk militær de kurdiske styrker i Rojava/nordlige Syrien.

Den tyrkiske stat er en del af den koalition, der bekæmper Islamisk Stat. Det er ligeledes denne koalition de kurdiske styrker er en del af og får støtte fra.

De kurdiske styrker har vist sig, at være det mest effektive våben på landjorden i kampen mod de sortklædte tyranner fra IS.

De kurdiske kvinder har i kampen mod IS bevist deres mod og deres ønske om frigørelse – en frigørelse som modsætter sig alt hvad IS står for – en frigørelse som vores regering har kæmpet for i blandt andet Afghanistan.

Det er derfor absurd, at vores regering og politiske partier er tavse, når den tyrkiske stat i den grad styrker IS ved at angribe de kurdiske styrker. Det er forkasteligt, at man tillader dette.

Den tyrkiske stats angreb er ikke kun målrettet kurderne, men mod alle, der kæmper for demokrati, frihed og fred.

PYD-Danmark kalder derfor de danske politikere til at handle omgående.

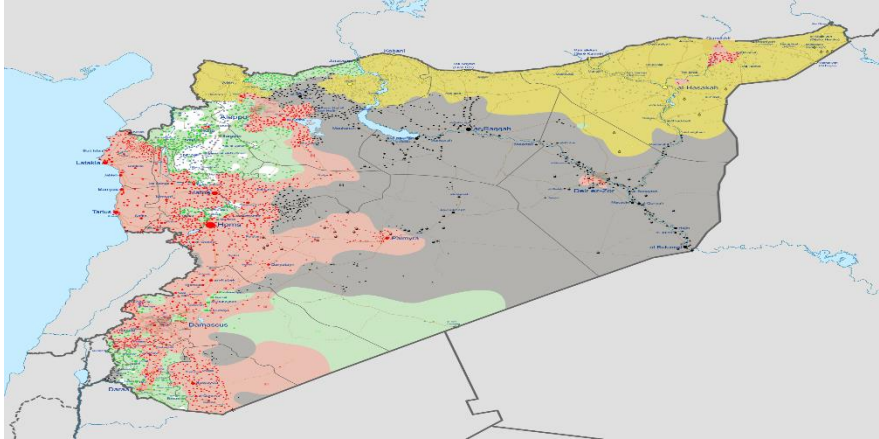

Venlig Hilsen

PYD-Danmark

Stop Turkish invasion in Northern-Syria

Turkish fighter-jets are bombing villages in Shehba and Efrin-Rojava-Kurdistan

In an active pursuit to prevent the development of the resistance situation against terrorism and extremist

groups, the Turkish air forces bombed the villages of ***Um Al Housh and Um Al Qura*** hours after their liberation from Daesh.

In addition, **Turkish artillery have shelled villages in the Shehba and Efrin areas.** As a result of this bombardment, ***four civilians have been killed and tens of people heavily***

injured, a further ten freedom fighters were killed. The bombardment is still ongoing.

This bombardment comes in an extermination campaign exercised by the Turkish state against the Syrian people. It is also a direct support for Daesh mercenaries after receiving a fatal blow from the revolutionary forces there.

These immoral practices by the Turkish state are incompatible with all international covenants and conventions and are directed against our people and the people of Syria.

The international community and the authorities concerned with fighting terrorism must intervene to prevent the Turkish intervention. Ignoring or turning a blind eye, by those who are concerned with the Syrian case, led to the expansion of Turkey's role in Jarablus and ultimately using their air force to bomb the surrounding areas.

These practices are conclusive evidence that the Turkish state does not differ from the Syrian regime in bombing and exterminating the Syrian people. This is the best proof that those parties endeavour to prevent any solution to the Syrian reality, by allowing extremist forces to regroup their forces in areas where they were previously defeated.

We strongly condemn the Turkish state's invasion in the Shehba and Efrin regions and their vile attacks. Erdoğan and his policies have been defeated in Mosul and Iraq. This is why he wants to invade Syrian territory to win back what he lost in Iraq. Turkey wants to take back the ``Misak-ı Milli`` territories it lost after World War II. Turkey's goal with these attacks isn't just to invade Northern Syria, but to invade Syria as a whole. ***Thus, all international powers should take a stance against the Turkish state's invasion towards Northern-Syria.***

We call upon our people everywhere to express their views and condemn these violations, crimes and the blatant infringement on the sovereignty of Rojava and Syria.

Kurdistan National Congress, 20 October 2016

Public Statement

Turkish Warplanes Bombed Villages in Al Shahba Area (Rojava-Kurdistan, Northern-Syria)

Since yesterday, Turkish warplanes have violently bombed the villages of *Um Al Housh*, *Um Al Qura* and *Hasiya in Al Shahba* area in northern *Aleppo*. These villages were recently liberated by the revolutionary forces. The bombing comes just hours after the liberation of 5 villages, *Al Shahba Dam* and *Syriatel centre* from Daesh terrorists.

We, the General Co-ordinating Authority of the Cantons of the Democratic Self-Administration (Al Jazira, Kobani and Efrin) condemn this blatant attack, perpetrated by the Turkish state against our people and threatens the lives of hundreds of innocent civilians.

We affirm that we will do whatever necessary to protect civilians and all other components in northern Syria.

We emphasise that the recent Turkish attack appears to be a reaction to the liberation of villages from Daesh terrorists. It is a conclusive evidence that the Turkish state is the defender of the terrorist organisation, Daesh, and other affiliated terrorist groups and individuals.

Accordingly, we call upon the international community, the United Nations, the United States, the Russian Federation, international human rights and civil society organisations, to act immediately and stop the Turkish aggression and prevent the Turkish state from threatening the peace and security of our region with their continued violations of Syria's sovereignty and international laws and conventions.

This attack must not be met with international silence, as it happened when Turkey occupied the city of Jerablus.

We also call upon all Syrians to act responsibly and stop the shelling, which proves that the losers are Syria itself and the political process to resolve the Syrian crisis.

The General Co-ordinating Authority of the Cantons of the Democratic Self-Administration (Al JAzira, Kobani and Efrin)

19/10/2016

A Call to the United Nations

UN High Commissioner for Refugees

Relief and humanitarian organizations and relevant countries fighting terrorism

With the beginning of the liberation of the Nineveh Plain and the city of Mosul – areas inhabited by more than one million Iraqi citizens – thousands of Iraqis began to arrive to Al-Jazeera Canton in Rojava to escape the horrors of war in a time this region is crowded with refugees from Iraq and Syrian cities as well who found a sanctuary in Rojava. In this time these Cantons lack necessary capabilities to provide needed services to those refugees. There is a number of camps for refugees in Al-Jazeera and Kobane and Afrin Cantons, occupied by massive numbers of Syrian and Iraqi families, such as; Newroz, Roj, Alhol and Mabrouka camps in Al-Jazeera canton and Shaheed Rubar camp in Afrin Canton.

These camps cannot bear the burdens of these huge flow of refugees continuing to come towards Rojava, which itself suffers from the suffocating siege and the closing of the crossings in the face of transporting or admission of any kind of aid and relief materials and goods.

We, as representatives of Kurdish, Arabic, Syriac and Assyrian political parties and forces, appeal to you to provide urgent financial and logistical support for the Democratic Self-administration in Al-Jazeera Canton in order to help with the refugee flows and to prevent an imminent humanitarian catastrophe, especially as winter approaches.

Kind Regards
