OECD
BETTER POLICIES FOR BETTER LIVES

Denmark's current distance from achieving 101 of the SDG targets

Based on data available for 101 of the 169 SDG targets, Denmark has currently **achieved 20 of the SDG targets,** including ODA (target 17.2) and ICT skills (target 4.4).
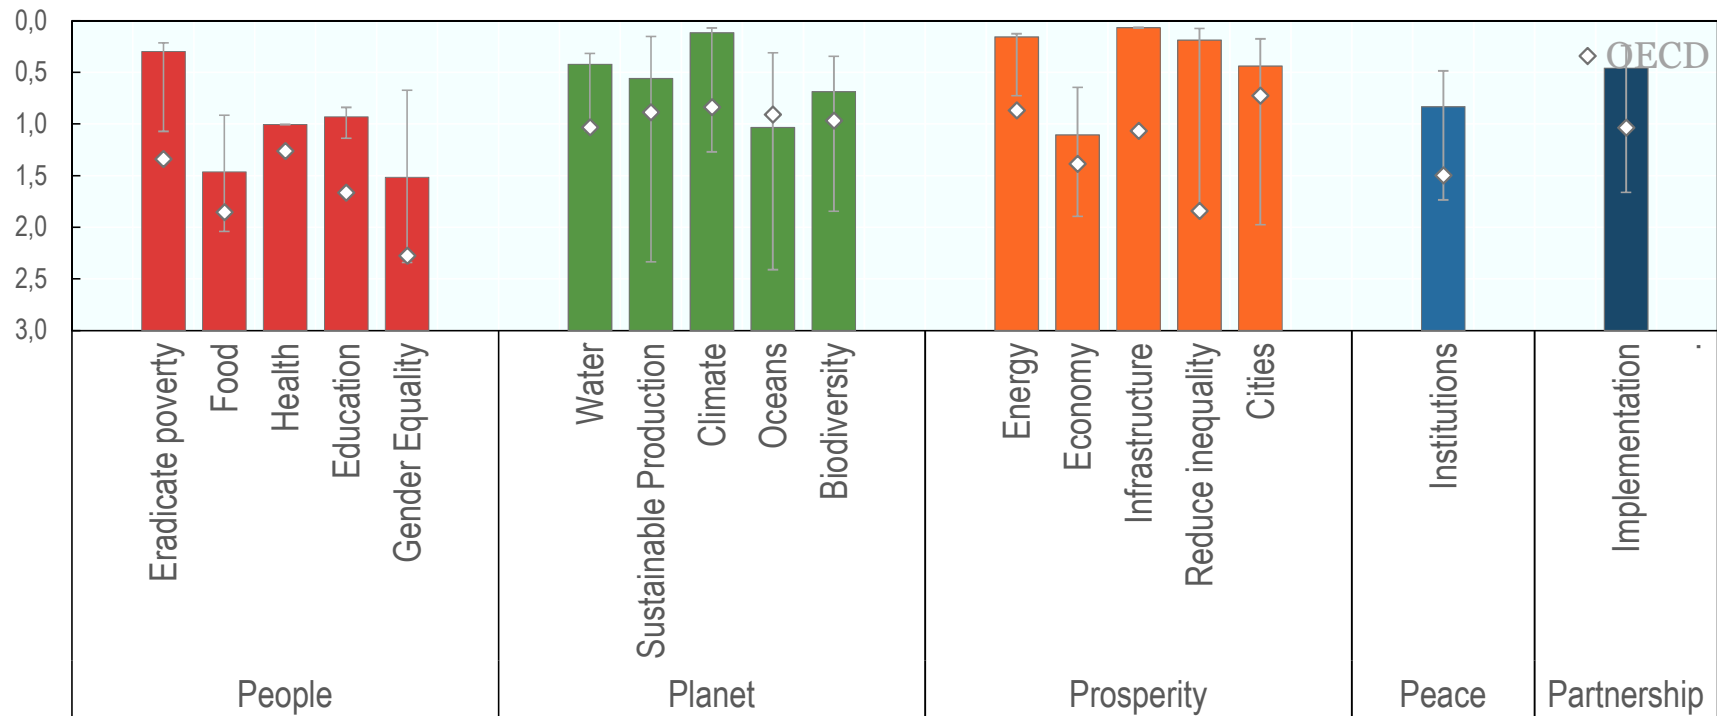

Largest distances from target are recorded for violence against women (target 5.2) and tobacco consumption (target 3.a).

Goals

1: Poverty
2: Food
3: Health
4: Education
5: Gender Equality
6: Water
7: Energy
8: Economy
9: Infrastructure
10: Inequality
11: Cities
12: Sustainable Production
13: Climate
14: Oceans
15: Biodiversity
16: Institutions
17: Implementation

—— Levels of achievement to be attained by 2030

The chart shows current level of achievement on each available target. The longer the bars, the shorter the distance still to be travelled to reach 2030 target (dotted circle). Targets are clustered by goal, and goals are clustered by the "5Ps" of the 2030 Agenda (outer circle).

Denmark's distance from achieving SDGs at goal level

The figure shows the average distance Denmark needs to travel to reach each SDG. Distances are measured in standardised units with 0 indicating that the level for 2030 has already been attained: and 3 is the distance most OECD countries have already travelled. 0 representing the 2030 target level. Bars show the average of Denmark's performance against all targets under the relevant Goal for which data are available, and diamonds show the OECD average. Whiskers show uncertainties due to missing data, ranging from assuming that missing indicators are all 3 standardised distances from the 2030 target level to assuming that they are already at the target level.
