En vision

Disputats til Bog

If one were to pool all of the resources tied to health and social services in a given community and had the opportunity to plan the delivery of health and social services with no limitations on the way these were planned except the sum total of resources, would the resulting system look like anything we know today? Although this may sound like a preposterous proposition, thinking this way is nonetheless the only way to achieve movement towards an optimal system. The author has not met one individual with whom he shared this thought who did not immediately recognize the potential for seriously positive development based on such a strategy. The question then arises, "What are we waiting for?" This book is designed as a manual for moving in that direction with sound argumentation for most aspects of what this strategy could come up against from opponents who think that tradition should prevail.

"Worldwide, the demand for health care services is rising inexorably at the same time available resources are being constrained. This book provides a practical and compelling roadmap to all those facing the myriad challenges of balancing care, cost and social conscience. Health care policymakers, managers and clinicians everywhere should read this book for its many lessons and insights!"

Jonathan P. Weiner, DrPH
Professor of Health Policy and Management,
The Johns Hopkins University, Baltimore, Maryland, United States.

Richard Evan Steele, MD, MPH, PDC, BCSPHM is the Medical director of the clinic "Klinikken Livet" in Silkeborg, Denmark with vast experience and knowledge used in his holistic view on medicine and health.

Socio-sundhedsbudget

Tre betingelser:

Samme som, eller bedre serviceniveau end hidtil

Nyt sygehus udvikling ikke tilladt

Maximum 24 timers ophold i primærsystemets akutsenge

Socio-sundhedssystemet

**Hospital og
andre kontraktslige
forhold**

Mål:

Udvikling af et fleksibelt, højt tunet og teknologisk avanceret primærsystem

Større reduktion af hospitalsindlæggelser

Storstilet ressource-mobilisering

Stærke og positive incitamentssystemer

Stærk positiv effekt på sundheden

Besparelser?

Alle vinder!

Re-etablere nærhed i tjenester

**Storstilet omfinansiering til styrkelse af primærsektor,
sundhedsfremme og prævention til gavn for alle**

Sygehusene kan koncentrere sig om deres kerneopgaver

Stor forbedringer i tilfredshed med tjenester

Hvad skal der til?

Politisk opbakning – tænke tank?

En projektby/byer

Kom i gang midler – anslået 20 millioner

Lovændring?
