A Declaration of the Independence of Cyberspace

John P. Barlow

Publication originale sur le site web de l'EFF, 9 février 1996. Version française sur ce site web. Publié avec autorisation de l'auteur.

Yesterday, that great invertebrate in the White House signed into the law the Telecom "Reform" Act of 1996, while Tipper Gore took digital photographs of the proceedings to be included in a book called "24 Hours in Cyberspace."

I had also been asked to participate in the creation of this book by writing something appropriate to the moment. Given the atrocity that this legislation would seek to inflict on the Net, I decided it was as good a time as any to dump some tea in the virtual harbor.

After all, the Telecom "Reform" Act, passed in the Senate with only 5 dissenting votes, makes it unlawful, and

> It is error alone which needs the support of government. Truth can stand by itself.
> — Thomas Jefferson, Notes on Virginia

Governments of the Industrial World, you weary giants of flesh and steel, I come from Cyberspace, the new home of Mind. On behalf of the future, I ask you of the past to leave us alone. You are not welcome among us. You have no sovereignty where we gather.

We have no elected government, nor are we likely to have one, so I address you with no greater authority than that with which liberty itself always speaks. I declare the global social space we are building to be naturally independent of the tyrannies you seek to impose on us. You have no moral right to rule us nor do you possess any methods of enforcement we have true reason to fear.

Governments derive their just powers from the consent of the governed. You have neither solicited nor received ours. We did not invite you. You do not know us, nor do you know our world. Cyberspace does not lie within your borders. Do not think that you can build it, as though it were a public construction project. You cannot. It is an act of nature and it grows itself through our collective actions.

You have not engaged in our great and gathering conversation, nor did you create the wealth of our mar-

Where humans and technology meet

Techfestival.

Where humans and technology meet

· Den nye internationale teknologi festival
· København, september 2018
· Muligheden for Danmark at være det internationael centrum og mødesplads for den næste bølge i teknologi de næste mange år
· Mange stærke kræfter arbejder på at få det til at ske

www.techfestival.co

the copenhagen letter

www.copenhagenletter.org

· manifest for den næste bølge i teknologi
· skabt under en 48 timers tænketank til den første Techfestival i København
· 150 tænkere, designere, akademikere, historikere, programmører og iværksættere
· +25 lande repræsenteret
· b.l.a. stifteren af kickstarter, manden der programmerede world wide web med tim berners lee,
· siden underskrevet og distribueret af +5.000 mennesker fra +100 lande.

the copenhagen letter

“To everyone
who shapes technology today

We live in a world where technology is consuming society, ethics, and our core existence.”

"**Tech is not above us**. It should be governed by all of us, by our democratic institutions. It should play by the rules of our societies.
It should serve our needs, both individual and collective, as much as our wants."

the copenhagen letter

“We will not tolerate design for addiction, deception, or control. We must design tools that we would love our loved ones to use. We must question our intent and listen to our hearts.”

Let us move from human-centered design to humanity-centered design.

We are a community that exerts great influence. We must protect and nurture the potential to do good with it. We must do this with attention to inequality, with humility, and with love. In the end, our reward will be to know that we have done everything in our power to leave our garden patch a little greener than we found it.

Data for the Benefit of the People

Recommendations from the Danish Expert Group on Data Ethics

November 2018

The Expert Group on
DATA ETHICS

9 recommendations on data ethics

The Expert Group recommends the following:

1. COUNCIL FOR DATA ETHICS

The government needs to establish an independent Council for Data Ethics. The purpose of the council is to support an ongoing focus on data ethics.

2. THE DATA ETHICS OATH

Company directors and employees actively address and take responsibility for questions and dilemmas around data ethics by taking a data ethics oath.

3. DYNAMIC TOOLBOX

The dynamic toolbox for data ethics should support the oath and provide tools and aids to help raise awareness and for specific activities in Danish companies.

4. DECLARATION OF COMPANIES' DATA ETHICS POLICIES

Denmark should be the first country in the world to demand that its biggest companies incorporate an outline of their data ethics policies in their management reviews as part of their annual financial statement.

5. A DATA ETHICS SEAL

A data ethics seal should be introduced as proof that a product meets data ethics requirements. A data ethics seal would make it easier for consumers to navigate digital products, and for companies to identify responsible partners.

6. NATIONAL KNOWLEDGE BOOST

The knowledge and insight into data ethics issues of the general population and the business community need to be boosted so that we as a society gain a greater understanding of the opportunities and consequences of using data.

7. DENMARK AS A FRONTRUNNER

Denmark should be visible in and impact European and global development in data ethics by being a frontrunner on the international scene.

8. STIMULATING INNOVATION AND ENTREPRENEURSHIP

Innovation and entrepreneurship with a focus on new data ethics business models are stimulated through co-financing, earmarking of funds and innovation contests.

9. DATA ETHICS IN PUBLIC SECTOR PROCUREMENT

It must be a requirement that digital solutions that are procured or developed by the public sector are data-ethical, so that the public sector drives demand for innovative and data-ethical solutions from companies.
