

Copenhagen, 15th May 2020

Dear Mr. President

March 6th, I sent you the attached letter about the biggest of all ongoing global crisis, Global Warming. An ongoing crisis, that is under extremely rapid development – being many times the size of Covid-19. An ongoing crisis, that if it is left to its own destiny, threatens to eradicate all of humanity much sooner than we imagine possible. It could happen in as little as 40-50 years from now.

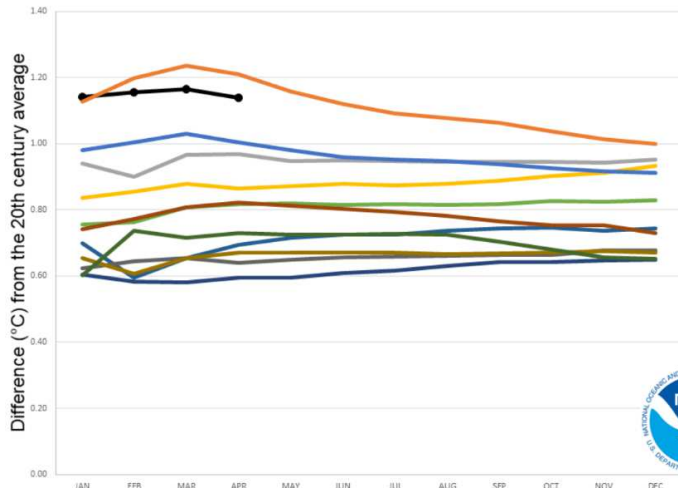

Every single day the sun delivers 1 Zetta Joule (1 ZJ is equal to 10^{21} Joules) more energy to Mother Earth than what is transmitted back into space, as infrared radiation. Day by day – 1 ZJ of energy is being stored in our oceans or used to melt parts of our Global and life supporting cryosphere! Simple as it is, people who has never believed in Climate Change, same as you – Sir, has never understood or accepted the danger of nature’s logarithmic or exponential functions, same as we have just experienced with the ongoing Covid-19 pandemic! These mathematical functions are calm and unproblematic until they get out of our human control! Global Warming is driven by the exact same mathematical destructive and lethal growth, as we have just seen unfold with Covid-19!

If we choose to do nothing, what we will see during this decade, is the same exponential growth in Global Warming, as we saw – in just 10 days, with Covid-19 cases, in USA. See the trajectory in the graphs, based on the actual numbers of Covid-19 infected persons. What the graphs shows us, is the same as an airplane reaching its “point of no return”, before it takes off ... impossible to stop!

Where Covid-19’s trajectory was, on March 15th – where everything was still fine, is where Global Warming is now, in 2020! Where Covid-19 was, March 25th, only ten days later – is where Global Warming will be, in 2030 – in only 10 years! In United States, you went from only having 2,900 infected – on March 15th, to 65,800 infected in 10 days! To more than 1,400,000 infected today!

Year-to-date Global Temperatures
 for 2020 and the ten warmest years on record

During the next 10 years – and if left to its own destiny, Global Warming will go from +2.0° Fahrenheit (+1.11° Celsius) to a really deadly +5.4° Fahrenheit (+3.0° Celsius), by 2030.

From 2030 – when we can no longer stop Global Warming, the graph will just take off and speed to the skies. But as Sir Stephen Hawking told us, shortly before his death, in 2018, the curve will start to flatten when we reach +400° Fahrenheit (+200° Celsius) – the graph will begin to flatten! It will flatten, when Mother Earth can

no longer sustain any kind of human or biological life – same as on planet Venus.

Global Warming's shared trajectory with Covid-19 ... and your only chance for reelection !!!

As you can see in my first letter to you – Sir, I tried to warn you – see the last paragraph in the letter, that you were seriously underestimating the power of Covid-19. When I wrote the letter, on March 5th (dated March 6th), you had 221 infected and 12 deaths! And March 4th, DJI was still performing at approximately 27,000. In the beginning of this year, I understood that you – Sir, were leading USA down a deadly pathway, that would kill all of your chances for reelection – sadly enough, also killing tens of thousands of your own fellow citizens. And so, you did!

Guided by your own staffs extreme fear to tell you the truth, your own wishful thinking, your extreme comments, your unfounded theories on how to use hydroxychloroquine (Plaquenil), chloroquine and even trying to inject “bleach” into patients, your lack of realism, FOX News – and your total lack of respect for science, knowledge and facts, have now put you in a very bad spot – Sir!

Even you don't understand – Sir, but if you want a second term, you need to respect science and the extreme power of nature's logarithmic and exponential functions. Same as Covid-19 – Global Warming is not a hoax – it's the biggest humanity killer, that we have ever faced! And you need to start to be respectful. You already have all the Republican votes, so start to be tactical. If you want to win (?), you need support from women, people of color, blue voters and News Media. Yet you insult and demean those whose support you cannot do without! If you don't, then accept your faith. The faith, that you will lose, on November 3rd! Accept the fact, that as soon as you have lost the election, you will be the loneliest person in the World! All Republicans will turn their backs on you!

Michael Flynn will turn his back on you, as soon as he finds out that FBI and the Justice Department will look for ways to restart the case against him, for lying to FBI. It will happen the same day as AG William Barr is replaced! Michael Flynn should have taken his sentence, go to jail – and waited for your pardoning power! What AG William Barr just did, is leaving Michael Flynn with no other choice, than to tell the truth and all that he knows – when USA gets a new Attorney General. Sorry to say, but AG William Barr – stupid as he is, just gave you the kiss of death! Your staff will turn their backs on you! Even your wife, sons, daughter and son in law will abandon you. And soon after you have left office – Sir, you will find yourself sharing destiny with Bernard Madoff, since the World will get to know everything – as in all, about you! And remember, you are only an asset to Deutsche Bank, as long as you are the President of United States of America – until November 3rd!

Your only chance for reelection, is to combat Global Warming.

By now – and if you don't plan a military coup against your own Constitution and United States of America, that will turn USA into a dictatorship like Venezuela, your only chance is to find a Global crisis, that you can be in charge of. A crisis, that will show the World, that you can lead – that you can be in control! And the biggest of all Global crisis is right in front of you – “Global Warming”!

The simplest argument to use, why we must combat Global Warming.

If you – Sir, do nothing, only 3 to 5 years from now – when your fellow citizens start to see and understand the power of Global Warming – you will see the same happen with Global Warming, as with “Covid-19”. Global economy, as well as US economy, will begin to deteriorate, until it suffers total collapse. A total collapse, from where the World can never recover! US economy will start to deteriorate, at the same time as New York starts to lose Lower Manhattan. At the same time as you lose your Mar-a-Lago and two-thirds of Holland is taken by the Ocean – the economy in USA, Asia and Europe will implode ... collapse, and the value of today's Dollar will drop to less than a Penny!

You still have a tiny chance to do something – but if you wait, it will be forever too late. If you wait, you will surely miss your chance for a second term – you will no longer be the President! And if you wait, the World, as well as USA, will go into a deep recession before a total collapse, and before we know it, the World will start to “boil” – on its track to become a new sister planet to planet Venus.

Two simple experiments for a start, in order to counter Global Warming.

In my last letter, I suggested two very simple “experimental” projects, that we can try to use, in order to make our planet colder. Two projects, where we try to counter the – day by day, effect of 1 ZJ of incoming surplus of heat. And yes, as is, I don't know if these two projects will work or not.

However, same as during the three-day grounding of all commercial aircrafts, in the United States, in the aftermath of the terrorist attacks, on September 11th 2001, the month of April 2020 has offered us an unexpected and very rare opportunity to see what happens to Global temperatures, when hardly any commercial aircrafts fly across the north pole, over the Greenland ice sheet or into or above the Arctic circle, releasing billions of cubic feet of water vapor and exhaust – day by day, that will normally block infrared radiation from Earth, to escape back into space.

Data could indicate, that there is a tiny drop in Global temperatures in April – see graph on page 1. A drop due to lack of the condensation trails (contrails) from commercial jet aircrafts, why we maybe could use this knowledge to shield the World – and reflect some of the incoming heat from the sun, during the warmest hours of the day. That Covid-19 actually gave us a tool, that we can use – wisely and scientifically, in order to reduce surface temperatures on a global-scale. The month of April has offered us this extremely rare opportunity, that would otherwise be very difficult to verify, had we not experienced the drop in commercial aviation. A drop in temperatures, that I hope and pray we will also see in May – since this may be an extremely important discovery. All we need to do, is to try to find out how to make use of this knowledge. The knowledge that Covid-19 gave us!

NOAA's latest data, May 13th 2020, show us all, that even we have an ENSO neutral, see NOAA's El Niño/Southern Oscillation (ENSO) diagnostic discussion, May 14th 2020, the Globe has never been warmer than it is now – when you include the lack of an El Niño. We are not in a year of El Niño, same as in 2016, but still the picture from NOAA show, that no year on record – so far, has had a warmer start! And the trajectory here in 2020 is alarming, even April give us a little bit of hope. If left to its own destiny, Global Warming will become “Covid-19” times hundreds of thousands.

Again, if you look at NOAA's graph – on page 1, what you see – in terms of an analogy, is 221 infected and 12 deaths – in 2010. 6,900 infected and 73 deaths – in 2020. And in only 10 years from now +65,800 infected and 1,260 deaths – again as an analogy. By 2030, NOAA's graph will show more than +5.4° Fahrenheit (+3.0° Celsius). And from 2030 the entire global population will start to boil, same as helpless lobsters being put into a pot – one by one.

However, since I understand that we can only handle one large crisis at a time, I will try to give you some information's regarding Covid-19 – Sir, the crisis that you have handled worse than bad, until now. Information's that may – or may not, be helpful to you, so you can get back to the biggest of all crisis – Global Warming, and maybe get reelected, if that is what you really want?

Covid-19 and the geopolitical danger, if it is turned into a biological weapon ...

First of all – we need to understand and avoid the obvious!

From a military and geopolitical point of view, it is important to understand, that “Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2)” – or just Covid-19, can be refined and cultivated into a “lethal weapon of mass destruction” in vivo, in vitro and if knowing its RNA – in clinical cilico studies, especially using AI (Artificial Intelligence), which is a fairly easy thing to do. And in floating Helium, an improved version of Covid-19 or a “new” and even more deadly SARS-CoV-X can be stored and kept alive, until end of time! As of now, the virus is isolated and kept alive in laboratories all around the World. In all of the laboratories working on finding a vaccine!

At the same time, it is important to understand, that this active and deadly virus can be transported around the World in a glass ampoule, smaller than a thimble. A tiny and fragile glass ampoule with virus, that can generate a new Global pandemic, if its content of deadly virus is added to a handle in a train, in the New York Subway or in London's Underground, added to a handrail in a station or just dropped and broken on a floor in a busy shopping mall, in a theater or a full sports arena!

And again, if we view the current Covid-19 as a first “Version 1.0”, what you can do in sophisticated laboratories, where you only focus on the lethal properties is, that you can improve Covid-19's characteristics – and turn it into a more deadly “Version 1.1” and from there into a “Version 1.2” etc., etc. Or even worse, a much more deadly “Version 2.0” a totally unknown and “new” SARS-CoV-3, where we will be equally as unprepared as we were, when the current Covid-19 pandemic hit us.

It is important to note – Sir, that we don't have the full knowledge on how Covid-19 started, why we should not – as in “NEVER – EVER”, draw hasty conclusions or start any kind of blame game, since it is counterproductive to the World's economy – and an extremely dangerous game to play, especially if we want to avoid World War III.

But what we can do – and what we must do, is to view Covid-19 as a new “weapon of war”. If you can control Covid-19, in a safe environment – same as a nuclear bomb, what you have is an amazing ability to control and plan structural and destabilizing attacks on your enemy.

If Covid-19 is turned into a “weapon”, you only need to send one or two “soldiers” (a 50-year-old woman and her husband). One or two persons, like GRU Colonel Anatoliy Chepiga and military doctor Alexander Yevgenyevich Mishkin, who tried to assassinate the Skripals, in 2018. One or two “tourists”, whom we may not even notice! If the person(s) came to New York, to spread the virus, how can you ever stop them? A virus that will kill hundreds of times more people, per million, than in your own country ... that will lead to unimaginable fatalities, unemployment and economic mayhem and hurt your “enemy’s” military capabilities, logistics and ability to fight!

What the mortality rates tells us ... and why Covid-19 must never be a “weapon” ...

If you look at the list below – data collected May 15th, you can see that the 10 most affected countries in the World, are USA and countries in Europe. The 10 most affected – out of +200 affected countries and territories! And then compare with China and Russia? AND AGAIN, this is not to start a blame game! This is only about numbers and facts, and we need to understand how hard NATO has been hit – war or no war !!!

1.	773 deaths per 1 million ...	Belgium
2.	587 deaths per 1 million ...	Spain
3.	523 deaths per 1 million ...	Italy
4.	501 deaths per 1 million ...	UK
5.	422 deaths per 1 million ...	France
6.	361 deaths per 1 million ...	Sweden *)
7.	329 deaths per 1 million ...	Netherlands
8.	308 deaths per 1 million ...	Ireland *)
9.	266 deaths per 1 million ...	USA
10.	217 deaths per 1 million ...	Switzerland *)
-	3 deaths per 1 million ...	China
-	17 deaths per 1 million ...	Russia

*) Ireland, Sweden and Switzerland are not member states of NATO, but are normally considered very close allies to the NATO alliance.

Again, what the numbers tells us is, that what you can transport in a tiny, tiny glass ampoule, smaller than a thimble, is by far the most powerful and destructive weapon, that the World has ever seen. Again – just see how hard NATO has been hit! This is why the question on how to avoid hostile use of SARS-CoV-X must be raised in UN, as soon as possible.

Humanity must never use viruses like “Covid-19” as a “weapon of mass destruction” – and again, no blame game! We can’t undo the past – but we can plan and avoid stupid mistakes in the future. We must make sure that no nation in the World will grow viruses in laboratories – like SARS-CoV-X. All countries have the ability to cultivate “Covid-19”, since the technology is fairly simple – and much cheaper and easier to use, than that of missiles and nuclear-weapon technology.

Correlation between Covid-19 and the pollen season on the Northern hemisphere ...

In order to understand the complexity of Covid-19 – and also understand how to treat its victims and getting a vaccine, we may have overlooked, that the virus need airborne allergens in order to generate a substantial number of fatalities – a high mortality rate, same as in USA and Europe.

In order to understand the problem, you need some kind of mathematical abstractive thinking, same as Sir Stephen Hawking was very gifted to have. This is why climatologists, meteorologists, allergists / immunologists, epidemiologists and other scientists must come together in order to establish the precise correlation between Covid-19 and allergens. If they do, what I think they will find is, that you had the perfect “storm” coming to New York. Same time as you had the beginning of the pollen season, Covid-19 made its arrival, why the city is the hardest hit place in the World.

Why do some nations suffer much higher mortality and morbidity than others ?

What we need to understand is, what the mortality rates tells us! Why has Covid-19 hit USA, NATO and EU so much harder than all other nations, on our planet – so far?

Why has New York's 19,4 million inhabitants suffered 1,416 deaths per million (m.pop), when Dubai's 9,9 million inhabitants (foreigners and locals) – the main international transit airport, on route from Asia to USA and Europe, has only suffered a mortality rate of 21 m.pop? Why is New York's mortality rate more than 67 times higher than Dubai's?

And again, why is the mortality rate today 266 m.pop in USA, compared to Canada's 147 m.pop? Or even more troubling – Mexico's 35 m.pop? Why is the mortality rate 7½ times higher in USA, than in your neighboring Mexico? If USA had the same mortality rate as in Mexico more than 75,000 Americans would still be alive! +75,000 of your fellow American citizens would still be here!

Why is the combined mortality rate 497 m.pop in Italy, Spain and France – in Southern Europe, compared to 27 m.pop in Poland, Lithuanian, Latvia, Estonia and Finland? And only 17 m.pop in Russia? What is the medical explanation, that makes Covid-19 become eighteen times more deadly in Southern Europe – compared to Eastern Europe?

When your experts have the answer on this fairly simple question – when they understand Covid-19's "anaphylaxis" reaction in some patients, in combination with IgE (Immunoglobulin E), then I hope and pray, that they will hold the key on how to avoid the many fatalities in USA and Europe. And if we can make mortality rates to go down – people will be more willing to go back to their normal life's – their life's before Covid-19. And when people return to their everyday life's, safe flock immunity – if possible, may happen much sooner – and we will safely start to ease social distancing. Hospitals will go back to normal and scientists will get more time to develop a good and safe vaccine.

Your only chance of a second term, is to combat the real killer – Global Warming ... ASAP ...

If your plan is reelection – Sir, which I believe it is (?), you need to take advice and follow orders. If you continue your self-destructive behavior of fact- and science denial – you will not get reelected. You will lose the election 5½ months from now. What will happen – Sir, is going to destroy your life. The extremely good life, that you have had until now. And if you – same as you do now, continue to claim a fast V-shaped recovery – you will never be reelected, since US economy will take more than 10 years to recover. At election day you should not expect more than 90% recovery – at best, why I will give you some numbers, in order to enhance your understanding of the simple reality:

The average lifespan of a short-haul aircraft is 25 years. A long-haul aircraft will live approximately 30 years, before its retirement. The average age of the Global fleet of airplanes is now being 12 years! The global demand for air travel will be reduced 50-75%, this year. Depending on a Covid-19 vaccine, it may take 5-8 years – at best, before air travel is back to same level, as in 2019. You do the math – Sir, but how many airplanes do you think Boeing need to build before 2025? How many new airplanes will airlines without customers buy, the next 5-8 years? US passenger and cargo carriers employ 750,000 people worldwide and help drive more than 10 million American jobs! If demand drop 50% how many of these jobs will be lost? And if no one fly – and no one makes hotel reservations, how many of the 17 million jobs will be lost in the hospitality and leisure industry? How many tourists will go to Disneyland? Grand Canyon? Las Vegas? Hawaii? Miami? LA? New York ... ???

If you had played the 80% recovery "card" – 82% recovery would have been a huge success! Now, that you have played and promised 100% recovery, before election day – you have turned a 99.9% recovery into a failure on your part! Why? How stupid is that – Sir? Where is your strategic and realistic mindset – and where is your team, protecting you from doing these terrible mistakes?

But worst of all – and let me say it again, why have you put Michael Flynn in a position where he has no other choice, than to make a deal – and witness against you, in order to stay out of jail? It is unbelievable – Sir. And William Barr – OMG !!! For your own sake, cut your ties to Rudy Giuliani, before his desire to speak will ruin every change you have, to get a normal life after your Precedency.

As is, the only card you have left to play – if you don't plan for a "Coup", is Global Warming. It is just about the only chance you have. Play it – Sir, and maybe (?) you will get your second term.

Yours sincerely,

Per Uggen
Ship Master and VTS-operator.
