

GLOBAL CITIZENSHIP EDUCATION

- Intercultural understanding and democratic 'dannelse'
Denmark - January 14th, 2021

With this the third international Togetherness Conference, we want to explore how to target and systematize teaching and learning in global citizenship and open the space for individual education and 'dannelse'. The sustainability of our planet and the sustainability of our human togetherness are where we find an entirely different agenda for education, which is often discussed in terms of global citizenship, intercultural understanding and democratic 'dannelse'.

The conference seeks to discuss, what we understand about intercultural competences, and how perspectives can be integrated into the education system based on the UN Sustainable Development Goal.
