

Dear Member of Parliament

I have been writing this email with attached documents in order to draw your attention to the worsening conditions of Turkey prisons. The more this authoritarian government in Turkey leading by Erdogan deepen his attitude towards a fascist regime, the more ten thousands political prisoners have permanently been faced with torture, isolation and all sorts of degrading treatments. Particularly in these times of corona, the situation has been worse and worse, we have so grave concerns about the prisoners.

On the other hand, in İmrali prison, Ocalan and his three fellows have been exposed the worst imprisonment conditions ever lived at this time over the world. European Council's regarding committee has already published his alarming report two months ago. In page 23 you can read all the details.

We believe that pushing our governments to press on Turkish authorities regarding to this problem will automatically direct Turkey towards democracy, human rights, transparency and accountability. It will definitely deter Turkish government to increase the level of her anti-humanitarian policies.

Ocalan is a person of peace, negotiation and dialogue which he has already proved it during the 2013-2015 peace talks, which was named as a Turkey Democracy Spring. We believe that if the lawyers and any sort of dialogue will be able to start with Ocalan, this deteriorating situation will change towards sustainability.

In the attached doc, you can read all the details, and also a question asked by a Left Party of Germany colleague to the EU minister as an example that you can inspire.

Please write your answer to this email address before 10.12.2020, and we will compile.
