

Preventing the Next Pandemic

A New European Health Security Council or Prime Ministerial Committee

An All Industry Sectors Platform Initiative?

By Prof. Mark Eyskens and Rio Praaning Prawira Adiningrat
Brussels, 18 August 2020
Update 28 September 2020

Post-COVID-19

Forecast of **COVID-19** economic damage (World Bank. Global Economic Prospects, June 2020)

Global GDP contraction of 5,2%

Deepest recession in decades

East Asia and the Pacific GDP **growth of 0,5%**

Latin America GDP **contraction of 4,7%**

Europe and Central Asia GDP **contraction of 4,7%**

North America GDP **contraction of 6,2%**

South Asia GDP **contraction of 2,7%**

Middle East and North Africa GDP **contraction of 4,2%**

Sub-Saharan Africa GDP **contraction of 2,8%**

E.g. UK economy shrinks by record 20% in April (Financial Times)

Forecast of **AMR** economic damage

100 trillion Dollars in additional healthcare costs & loss of productivity

(UK Review on Antimicrobial Resistance, 2016)

POST-COVID-19 INDUSTRY OUTLOOK PER SECTOR

Insurance

*Expected global loss of **USD 203 billion***

Tourism

*Estimated global loss of **USD 80 billion in Q1 2020***

Aviation

*Worldwide loss of passenger revenues in 2020: **USD 113 billion***

Hospitality

***40-90 % decrease** in monthly hotel occupancy rates for May 2020 globally compared to May 2019*

Transport

*Global freight forwarding market expected to **contract by 7.5%***

In most cases: worst crisis ever faced

“For me, it is crystal clear – we need to build a stronger European Health Union” Ursula von der Leyen, President of the European Commission, State of the Union Address September 2020

BUT: European Parliament wants more **Direct Action** particularly on API pollution and AMR

European Parliament resolution on a European One Health Action Plan against Antimicrobial Resistance (AMR) (2017/2254(INI)) of 13 September 2018

European Parliament Resolution on the EU’s public health strategy post-COVID-19 (2020/2691(RSP)) of the 7th of July 2020

*“Calls on the Commission to propose the **creation of a European Health Response Mechanism (EHRM)** to respond to all types of health crises, to strengthen operational coordination at EU level, and to monitor the constitution and the triggering of the strategic reserve of medicines and medical equipment and ensure its proper functioning”*

European Parliament Motion for a resolution on a strategic approach to pharmaceuticals in the environment (2019/2816(RSP)) of 9 September 2020

*“Parliament on September 10, 2020 declared **that the COM insufficiently acted and presented a serious delay in developing concrete actionable plans** and targets from the 2019 Communication. With a Motion for a Resolution, MEPs stressed for more careful use of medicines, the development of greener manufacturing and better waste management in the EU*

Industry Cannot Sustain Another Pandemic

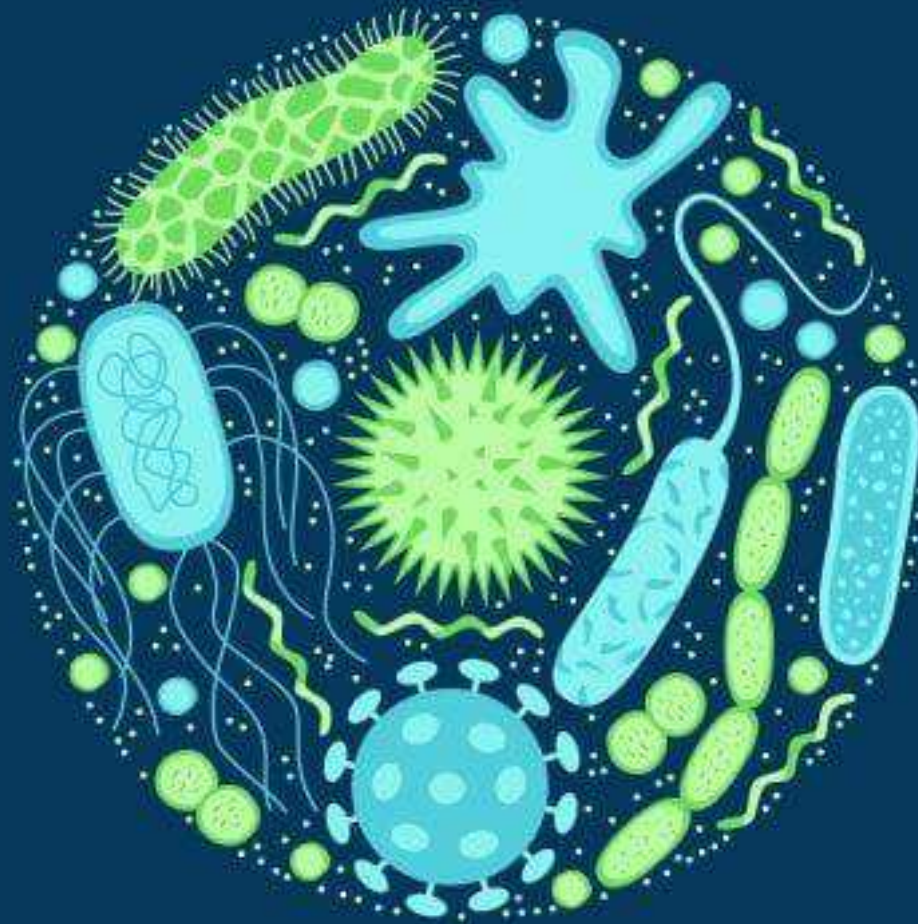

New Prime Minister-level European Health Security Council or Committee

2020

700 000 annual deaths globally

TODAY AMR costs the EU EUR **1.5 billion** per year in healthcare costs and productivity losses

2050

At current resistance rates, the total GDP effect in OECD, accounting for increased healthcare expenditure, would amount to **2.9 trillion USD** by 2050. Globally it could push up to **\$100 trillion**

10 million deaths annually

Could push 28 million more people into poverty

Antimicrobial Resistance (AMR) in *numbers*

AMR is caused by **overuse** of antibiotics in **agriculture** and **healthcare**

AMR has left us with but a few effective antibiotics. However, a systemic failure prevents the invention and production of new ones.

The current system makes health security a business of companies.

The pharma business is obviously for profit. In its letter of 10/01/2007 the Commission misjudged their role and trusted them with Europe's Health Security. This must change. Now.

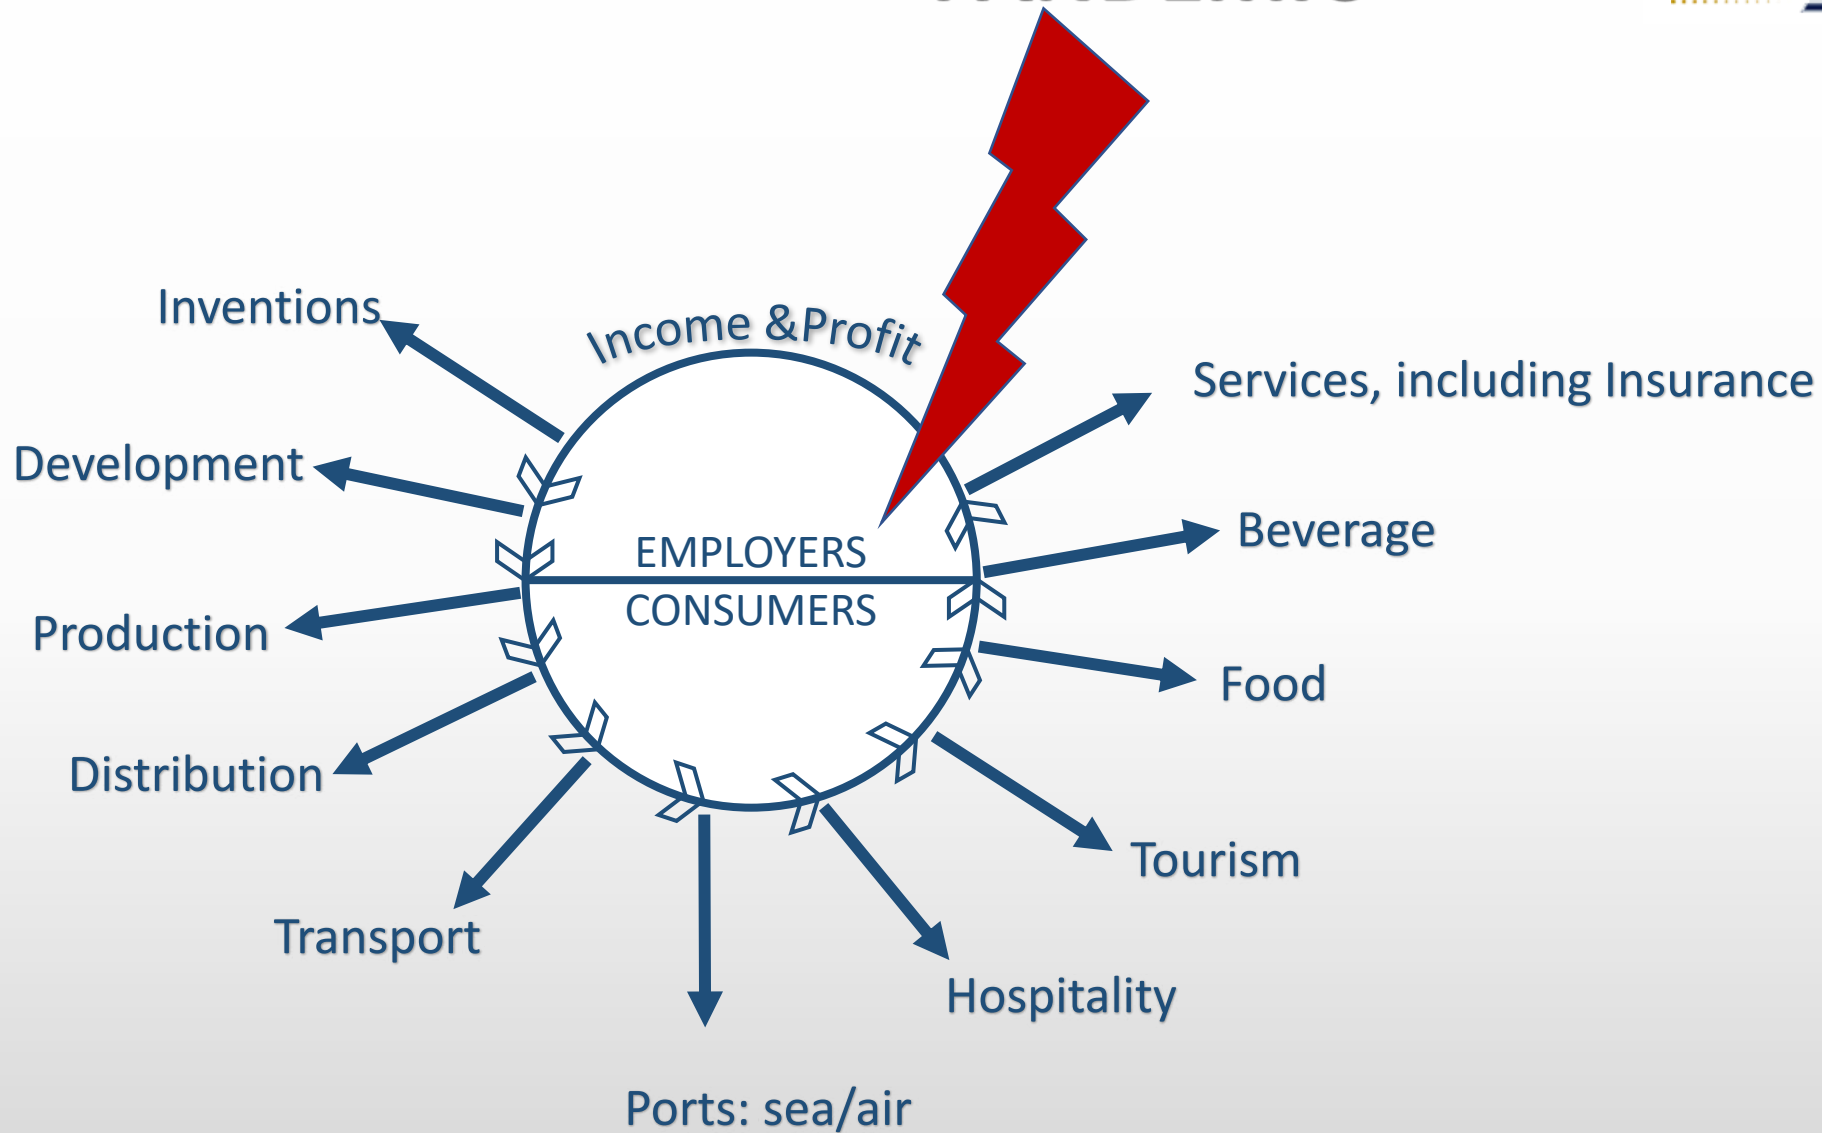

Before an AMR Pandemic surprises us all.

*“It is now evident
that Public Health
and the Economy are
one and the same”*

Lord Jim O'Neill (former Commercial Secretary to the UK Treasury, former head of the 2016 UK Review on Antimicrobial Resistance, and former Chief Economist for Goldman Sachs) speaking at a PA webinar on AMR, 4 June 2020.

PANDEMIC

The European Commission has shown its limits in dealing with COVID and AMR

“There is little evidence that the health burden of AMR has reduced.”

15 November 2019: EU Court of Auditors Report on DG SANTE’s work to tackle AMR (despite spending 1,5 billion Euro mainly on studies)

16 September 2020: European Commission President Von der Leyen does not mention one coordinating body to prevent/prepare for next Pandemics

PREVENTION of Pandemics: NOT TO BE MIXED WITH OTHER HEALTH ISSUES

Current plans to fund DG SANTE with 9 bn Euro include over 10 *other* priorities → ineffective, untransparent, unplayable

All industrial sectors need only one FOCAL POINT that has only one task: the prevention of any next pandemic

What is needed:

- ❖ **Highest level of coordination and management**
- ❖ Securing sufficient medicine (repatriation of EU Industries, Strategic Reserves, development of new medicines including alternatives)
- ❖ Immediate Policy Measures to curb the threat of AMR

Institutional Renewal

*Existing 2013 Health Security Committee 'promoted' to a Health Security **Council** at Prime Ministerial level*

OR

*Health Security Prime Minister **Committee***

- ❖ *New Prime Minister level Council. May require a change to the Treaties. May take time*
- ❖ *Has its own DG and budget*

- ❖ *Prime Ministers lead, meet every six months or monthly in times of crisis; Ministers of Health meet monthly*
- ❖ *Committee has its own permanent staff and budget*

- ❖ *Prime Ministers/Health Ministers in the lead*
- ❖ *NEW Directorate-General or Permanent Staff*
 - ❖ *NEW and unique budget*
- ❖ *Industrial-Consumers-Expert/Council in supervisory role*
- ❖ *Only focus: prevent/prepare for/pre-empt any next pandemic*

Institutional Renewal

Timeline

2013

Establishment of the current EU Health Security Committee. Main focus: response to biological weapons use

2013-2020

Indecisive discussion on broadening of role

2020

All industry sectors present emergency proposal to EU national parliaments, European Council, European Parliament, European Commission: morph the EU Health Security Committee into an EU Health Security Council or Prime Ministerial Committee

Timeline

October 2020

Immediate preparatory steps towards All Industry Platform on EU Health Security Council or Prime Ministerial Committee on Pandemic Prevention

November 2020

Start of the Platform

November 2020

Formal memorandum signed by all major European industry sectors and relevant industry associations calling on all EU institutions to establish EU Health Security Council on Pandemic Prevention

December 2020

URGENCY DEBATE in European Parliament on Platform call

December 2020

Decision by German EU Presidency (Angela Merkel) to start formal multi-stakeholder EU working group on the establishment of a new EU Health Security Council or Prime Ministerial Committee on Pandemic Prevention

PA Europe and PA Asia provide holistic and integrated advice. They have a triple security focus:

Water Food Jobs

The PA International Foundation adds its own experience and networks. It initiates and organizes top-level conferences, (global) webinars, multi-stakeholder platforms and academic chairs. In the past 5 years its focus is on combating emerging diseases – in particular a potential Antimicrobial Resistance pandemic, a multiple of the danger that the coronavirus represents. In 2014 PA published its first global AMR top expert poll: over 80% demanded immediate action to prevent a devastating pandemic in the next 2-5 years.
