

Den 30. august 2021

Invitation to webinar:

A sustainable food transition for a climate-neutral Europe: Lessons learned in the Nordics

Time: Den 3. september 2021, kl. 10:00-11:30

Place: Online webinar via Zoom

Greenhouse gas and nitrogen emissions from agriculture are a major challenge. The production of food (including primary production, land use change, processing etc.) is estimated to account for almost one third of all anthropogenic greenhouse gas emissions of which agricultural production is responsible for more than 80%.

The webinar will present arguments and examples of how a transition towards more sustainable and plant-based production and consumption may benefit farmers, food producers, and rural areas while contributing to the reduction of emissions of greenhouse gases and nutrients.

The webinar is presented by Nordic Council of Ministers, AirClem, Natur och Miljö as well as Green Transition Denmark.

See the attached program and report. Access further information on our website [here](#).

Guide to access the webinar:

Participation is free of charge, but registration is required. Registration can be accessed [here](#).

After being registered you will get an email confirming your registration. You access the webinar through the following link (which will also be in the email confirming your registration)

Access the webinar here (Zoom-link):

<https://us02web.zoom.us/j/81758538997?pwd=L3hMeFVSa29kRDlKTDI6Y2pwMkFCZz09>

Please be patient while we let participants into the meeting. We will be ready to let people in 30 minutes before the webinar starts (9.30).

Preparation

We hope that you make sure that you have a stable internet connection. If there are connection issues it might be advantageous to access the internet through a cable. We suggest that you participate through a computer and not a smartphone or tablet.

During the webinar all participants must turn off their microphones and cameras to ensure a stable connection. When you are let into the meeting make sure to choose "Speaker View" and turn on "Participants" and "Chat", so that it is visible to the right side of your screen. Additionally, you must confirm that you want to use audio through your device during the meeting (click on "use computer audio").

Afterwards you can choose input for your camera and microphone. If your audio or microphone does not work, try to switch between the options until you find the right option.

Test you gear

You can either use Zoom via their online platform or by downloading the Zoom app directly on your device. You don't have to create an account to participate in the meeting.

When you use the link above, the program (Zoom) will ask you to install the Zoom app on your device (unless it is already installed). You can then follow the guide to install the app or choose to access Zoom online. Please enter your **name and/or organization** in Zoom. You can also change your name after you have been let into the meeting by using the "rename" function (in the bottom of your window).

Microphone and sound

If you want to ask a question to the presenters or the organisers: Please write your question in the chat. Make sure it is clearly worded. Your microphone won't be turned on unless it is necessary for your question (Write in the chat, that you would like to ask the question with audio).

If you have further questions, then feel free to contact me (js@rgo.dk or +45 60388342).

Kind regards on behalf of
Green Transition Denmark,
Jeppe Skjærlund
