

CONFERENCE:

BRAZILIAN AND DANISH CONTRIBUTION TO THE CHALLENGE OF SUSTAINABLE FOOD SUPPLY

Venue and date: Copenhagen, Chamber of Commerce, October 28, 2021

Main auditorium at Børsen, Slotsholmsgade 1, 1217 Copenhagen K.

Coffee, refreshments and lunch will be provided.

The Embassy of Brazil in Denmark, with institutional support from the Danish Agricultural & Food Council, Food Nation and DAKOFO, has the pleasure to invite you to attend the conference.

Focus of the event:

The main objective of the event is to highlight the importance of maintaining a dialogue between Denmark and Brazil in sustainable agriculture. If an increase of 70% in demand for food is to be met by 2050, both countries, as major producers, will play a big part in meeting this challenge through use of advanced and environmentally friendly policies and corresponding Brazilian and Danish technologies. Counting on Brazilian experts that will be brought in especially for this occasion as well as their Danish counterparts from agribusiness, academia, environmental non-governmental organizations, trade, finance and industry, this conference is a unique opportunity to not only learn more about what is being achieved in sustainable agriculture, both in temperate and tropical climates, but also to meet and network with the people directly involved. The event will be an opportunity to promote cooperation among universities and research centers, as well as partnerships and new business among agritechs from both countries.
