Emne: Invite - GRC Parliamentary Meeting on “Making Change Happen: Boosting Parliamentary Action on Renewables”

The **IRENA Parliamentary Engagement Team** is pleased to share with you an invite from the [Global Renewables Congress](#)’ Chair, Hon. Bärbel Höhn, to join the GRC Parliamentary Meeting on “**Making Change Happen: Boosting Parliamentary Action on Renewables**”.

The meeting will take place virtually from **10 am GMT – 12 pm GMT on Thursday, 22nd April 2021** and aims to foster a global, peer-led policy dialogue on the entry points for renewable energy legislation in parliamentary processes to build back better together. You are cordially invited to share your personal experiences and expertise with Parliamentary Members of the GRC, the [GRC Advisory Board](#), and energy experts as well as MPs from around the world.

The COVID19 pandemic has confronted us with the consequences of an unprecedented global health crisis. Additionally, the effects of climate change are becoming increasingly visible and are more severely impacting societies, economies, and the environment. It is time for profound political action on both fronts! Legislators now have the chance to direct the large-scale post-COVID recovery packages into green channels for a future that is sustainable, resilient and inclusive. The decisions taken today on how build back will determine the infrastructure for decades to come. Parliamentarians are at the heart of this transition.

To ensure your participation in this dialogue, **please save this event on your calendar and make sure to register** by setting up your picture, name and affiliation [here](#).

Sincerely,

IRENA Parliamentary Engagement Team
