

Resolution
of the Sejm of the Republic of Poland
of 23 March 2022
on committing war crimes, crimes against humanity and human rights violations
by Russia in Ukraine

The Sejm of the Republic of Poland strongly condemns the acts of constant violence, war crimes, crimes against humanity, acts of genocide, systemic violations of human rights and other criminal offenses against international law committed on the territory of sovereign Ukraine by the Russian Federation armed forces, together with its allies, at the behest of military commanders being under the direct authority of President Vladimir Putin.

The Sejm of the Republic of Poland calls on all states that recognize the sovereignty, territorial integrity and right to self-determination by Ukraine to support, using all available means, the initiation and conduct of proceedings before the International Court of Justice and the International Criminal Court, and to use their powers in all international organizations of which they are members, to hold Vladimir Putin, members of the Russian Security Council and commanders of the Russian Federation armed forces responsible for directing and committing war crimes, crimes against humanity, acts of genocide and systemic human rights violations on the territory of sovereign Ukraine. The publicly available evidence justifies the recognition of Vladimir Putin, already today, by the Sejm of the Republic of Poland and by the international community as a war criminal.

The Sejm of the Republic of Poland appeals to the parliaments of democratic countries around the world and to the European Parliament to recognise Vladimir Putin, the members of the Russian Security Council and the commanders of the Russian Federation armed forces as the persons directly responsible for these acts and to subject them to the most far-reaching sanctions possible.

The Sejm of the Republic of Poland expresses its unwavering solidarity with the free Ukrainian people and the democratic state of Ukraine.
