Bilag: Skønnede konsekvenser af elevfordelingsaftalen på kommuneniveau

Bilaget præsenterer beregningsgrundlaget bag aftalen om den Koordinerede Tilmelding for Gymnasiale Ungdomsuddannelser. Beregningsgrundlaget er baseret på søge- og tilgangstal fra 2020.

Det bemærkes, at beregningerne er behæftet med meget store usikkerheder, som bl.a. skyldes, at beregningerne beror på midlertidige beregningstekniske kapaciteter og historiske søgemønstre samt forskelle mellem tilgangs og ansøgerpopulation, herunder at ufordelte ansøgere ikke er medtaget i beregningsgrundlaget. Dertil kommer, at der er store variationer mellem modellerne ift. antallet af ufordelte ansøgere, som ikke indgår i beregningerne. Denne store variation gør det meget vanskeligt at sammenligne modellerne direkte, herunder særligt at drage konklusioner omkring betydningen af justeringer ved tilløgsaftalen ift. model bag aftale af 10. juni 2021. Konsekvensberegningerne skal derfor tolkes meget varsomt. Dette gør sig særligt gældende på lavere aggregeringsniveau – herunder fx kommuneniveau. Yderligere kommer på lavere aggregeringsniveau, at beregningerne er særligt afhængige af den konkrete kapacitetsfastsættelse, hvor der i konsekvensberegningerne er benyttet beregningstekniske kapaciteter. De endelige kapaciteter fastsættes så de bedre tilgodeser aftalens hensyn – herunder forventes antallet af ufordelte reduceret. For en uddybning af disse forbehold henvises til metodeafsnit i hovednotatet ”Skønnede konsekvenser af elevfordelingsaftalen”.

Skønnede konsekvenser for ansøgernes 1. prioritetsopfyldelse og transporttid på kommuneniveau

Tablet 1-4 viser andelen af ansøgere, der får opfyldt 1. prioritet og andelen, der får mere end 40 minutter i transporttid. Begge dele opgjort på kommuneniveau for hver uddannelse.

Tablet 1. Ansøgere til stx, opfyldelse af 1. prioritet samt transporttid ved ny fordelingsaftale

| Stx | Andel opfyldt 1. prioritet | Andel 40+ min. transporttid |

Anm.: Tilgangen af 1.g'ere afviger både i antal og fsva. elevsammensætning fra ansøgerpopulationen, som fordelingsmodellen hviler på. Derfor kan opgørelserne af antal institutioner med høj andel af elever med ikke-vestlig herkomst mellem ansøgere og 1.g'ere ikke sammenlignes 1:1.

Anm.: Tilgangen af 1.g'ere afviger både i antal og fsva. elevsammensætning fra ansøgerpopulationen, som fordelingsmodellen hviler på. Derfor kan opgørelserne af antal institutioner med høj andel af elever med ikke-vestlig herkomst mellem ansøgere og 1.g'ere ikke sammenlignes 1:1.
