LINDA WU

# FOREWORD

**C**hinese communist regime has become not only an issue, a crisis to the world but disasters when time entered into 2023. The battle between the democracy camp and autocracy camp in a big picture of geographical politics is seen as the battle between the United States and China, the two big giants on this planet, but focus in a micro picture, the warfare has started everywhere, including Denmark, a small country with the population of 5.8 million, nearly 6 million.

The most crucial situation of our Danes is not only the declining of the business with China, but also the security of the state, the faith of the value and the safety of individual Danes. This report is addressing the current crucial issues in the relation between Denmark and China, and clarifying the reasons of denying the renewal of the Danmark-China comprehensive strategic partnership.

## WHO WE ARE

The report is based on the seminar discussions titled as Denmark-China Issue Discussion held by the Kinesisk Salon. The Kinesisk Salon is a project group providing Chinese teaching, Chinese culture communication and Denmark-China Issue Discussion.

The author of this temporary research report are all Danish citizens who are Chinese origins. Their personal experiences and the knowledge of Chinese communist regime glittered in the inputs.

## KEY POINTS

In the United States, both democrats and republicans have reached a consensus that security is much more important than economic interests, because no safety, no money. Denmark has moved to the opposite side in the first phase of the unrestricted war set by China due to the renewal of the Denmark-China Comprehensive Strategic Partnership Agreement.

In the relation to China, the USA restrictions on investment in China Tech are being implemented, and the majority of US firms don't see China as priority for investment or business because AmCham survey shows companies' outlook for China is negative. However, big families in Denmark are still driving the Danish government to renew the Denmark-China Comprehensive Strategic Partnership Agreement. How much lost will these big families have if the war with China started, all the members in the democratic camp signed the agreement to give sanctions on China? In this case, Taiwan has good experiences to share.

Taiwan has become the throat of economy circulation geographically. It is also a key to success in the battle against China. Taiwan also has set a good example of how to deal with the sanctions of pineapple by China.

Between democracy and autocracy, we cannot stay neutral. However, democracy has declined and the value system has been shaken in Denmark since 2012, Jintao Hu visited Denmark.

The analysis of the facts and evidences make the report come to the conclusion that if it was a naiveness in signing Denmark-China Comprehensive Strategic Partnership 10 years ago, it can be a sin to renew it when democracy camp now is in both an unrestricted war and a real war with China, because it shows Denmark has stepped to the side of China by the action of renewal.

The report also provides methodology to develop business without China, which can be very much practical for Denmark, introduced by the panels guests of Denmark-China Issue Discussion from the United States and Taiwan.

- By Kinesisk Salon

## PART ONE

### THE IMPACT OF THE DENMARK-CHINA JOINT WORK PROGRAM (2017-2020) - THE DECLINING OF THE DANISH VALUE

In 2008 , Denmark established a comprehensive strategic partnership with China. Since then, the bilateral relation has been deepened and the cooperation fields have been expended dramatically. In order to gain considerable economic benefits in this cooperation, Denmark pays more attention to trade and invest in China.

#### 1.1 The Background

In May 2017, Denmark and China announced the Denmark-China Joint Work Program (2017-2020), upgrading the comprehensive strategic partnership to a higher level, including strengthening political, judicial, international affairs, security, national defence, economy, transportation, infrastructure, science, education, culture, tourism, academics, food and agriculture, public health, welfare cooperation, etc.

In November 2021, Danish foreign affairs ministry announced that “Denmark and China agree to renew Joint Work Programme to accelerate green transition”.

The strategic partnership is based on the premise of reaching a consensus on the following three points (index 1) :

Danish government complies to adhere to the one-China policy, do not support Taiwan's entry into international organisations, and do not conduct official exchanges with Taiwan.

Both sides reaffirmed their commitment to the promotion and protection of human rights, and continued to attach importance to human rights exchanges and cooperation on the basis of equality and mutual respect.

Both sides unconditionally condemn all forms of terrorism, strengthen consultation and exchanges on counter-terrorism, and reaffirm that the United Nations should play a leading role in the fight against terrorism.

#### 1.2 Heavy Expenses of the Strategic Partnership

1.2.1 Chinese government regards Uighur as a terrorist organisation. This means, while the partnership between Denmark and China is set up, according to the consensus of strategic partnership on point 3, Denmark is officially announced that it is a supporter of Chinese government in the persecution of Uighur.

1.1.2 Chinese government regards Falun Dafa(also called Falun Gong) practice as sect and terrorist group. Although Denmark granted asylum permission to Uighur and Falun Dafa practitioners who were persecuted in the homeland, the demonisation of Falun Dafa by the Chinese communist party was reprinted by the Danish media. This has deeply influenced Danes' and changed the cognition on the protection of human rights.

As a result, there came an unwritten rule that Danish media would not discuss no condemn the persecution of Falun Dafa practitioners openly.

In fact, Falun Dafa practice group over the world have received more than thousand awards from all walks of life, especially in the United States and Canada.

May 13, 2023 is the 31st anniversary of Falun Dafa's introduction to the world and the 24th "World Falun Dafa Day".

Since 1996, when "5.13" approaches each year, awards or congratulatory letters from federal congressmen, politicians at all levels, state and town mayors in the United States and Canada.

This year, so far three cities in Ohio have commended Falun Dafa and declared Falun Dafa Day. They are Mayor of Mason , Barbara J Spaeth, Mayor of Sharonville, Kevin M. Hardman, Mayor Scott Brunka of Lebanon, Presenting awards and proclaiming Falun Dafa Day.

### **1.3 Economical Dependence on China**

In 2021, China became the third biggest import partner for Denmark with the highest trade surplus. (Index 2)

### **1.4 The Impact of the Economical Dependence on China - Declining of the Freedom of speech.**

1.4.1 Oct 19, 2011, while Chinese foreign minister visited Denmark, the press conference was suddenly cancelled. The reason for the cancelation was a notice from the Chinese Embassy, saying they did not want to see the NTDTV reporter to present on site.

1.4.2 June 14 2012, when Hu Jintao, the former President of China visited Denmark, the reporter of NTDTV received a notice from the Danish International Press Center informing that getting a press card for to attend the press conference, a negotiation with Chinese embassy was a must.

1.4.3 June 5, 2013, when Yu Zhengsheng, the former Chairman of the Chinese People's Political Consultative Conference visited Denmark, the reporters of NTDTV and Epoch Times were refused to the press conference.

1.4.4 The symbolic cases of the declining of the freedom of speech is the Tibetsagen. (Index 3)

In 2012, while the former Chinese President Hu Jintao visited Denmark, Copenhagen police stopped the Danish protesters and detained demonstrators who advocated peacefully. The demonstrators included Tibet supporters, Falun Dafa practitioners and China democratic protesters.

In 2015, the Ministry of Justice set up a Tibet Committee to investigate individual incidents of the case.

In December 2017, the Tibet Committee's report concluded that Copenhagen police had carried out a "manifestly illegal order" not to allow Chinese leaders to see demonstrators.

In 2018, it was revealed that both the Ministry of Foreign Affairs and the State Department had backup emails, which the Tibet Committee did not receive. It was also revealed that police had used the same practice on previous state visits.

Therefore, the Tibet Committee reopened the investigation. The investigation covered all the visits from China since 1995 and the potential violations besides the Danish police.

In March 2022, the Tibet Committee issued a report in which it severely criticised the Ministry of Foreign Affairs and the Police Intelligence Bureau. The Ministry of Foreign Affairs has bowed to Chinese interests several times and, together with PET, has put enormous pressure on the Copenhagen police over the years to cancel or hide legal demonstrations during official Chinese visits. According to the report of the Tibet Committee, this is very critical.

The Committee has investigated 212 Chinese visits, 182 million documents were investigated, and 108 people were interrogated. Three former prime ministers, senior officials, and some authorities in the police, defence and intelligence services.

The final outcome of the Tibet case is the state attorney charged two midlevel officers for lying in court. Since then, the Tibet case has been silent. Copenhagen police compensated more than 100 demonstrators afterwards.

1.4.5 In conclusion, the obvious consequence of the strategic partnership with China is that over concern of the economic benefits has driven Danish authority to violate Danish Constitution and basic moral values, behaved the same as a totalitarian government while encountering the human rights.

## **1.5 The Impact of the Economical Dependence on China - Danes start self censorship and lost political sovereignty.**

1.5.1 Dansk Kina-Kritisk Selskab was established in April, 2020. While Thomas Rohden, the chairman of Dansk Kina-Kritisk Selskab invited his friends and other young politicians to be the board members, some of them refused politely and told him frankly that they were afraid that their family business might be affected if Chinese Embassy knew they joined Dansk Kina-Kritisk Selskab and provoke CCP.

1.5.2 While Anders Storgaard and Thomas Rohden help Ted Hui, a former Hong Kong politician to flee out of Hong Kong, one of the Danish politicians who used to support openly suddenly became silent and refused to speak publicly about the case. The reason was that, she frankly spoke to Anders Storgaard and Thomas Rohden, she got warning from the Chinese Embassy.

1.5.3 In conclusion, because of the the strategic partnership with China, Danish politicians had to self discipline themselves to satisfied the Chinese embassy so that

they can maintain the political position. This is a sign to show that Denmark has become a province of China politically.

## **1.6 The Impact on Danish Foreign Policy (Index 4)**

1.6.1 In 2009, former Danish Prime Minister Lars Løkke Rasmussen met with Tibetan spiritual leader Dalai Lama. Immediately afterward, China threatened to boycott COP 15, the Copenhagen climate change conference, and imposed a targeted informal freeze on Danish exports. China relented only after Copenhagen sent it an oral note reiterating its adherence to the one-China policy and opposition to Tibetan independence.

1.6.2 February 9, 2015, Danish Prime Minister Helle Thorning-Schmidt refused to meet with the visiting Dalai Lama. Although before taking power, she had said she would "of course" meet the Dalai Lama as prime minister.

11.6.3 Before 2009, two more Danish prime ministers had met with Dalai Lama: Poul Nyrup Rasmussen in 2000 and Anders Fogh Rasmussen in 2003.

1.6.4 In conclusion, Danish foreign policy has declined to a situation to orient the will of China rather than independent line.

## PART TWO

### REASONS ANALYSIS

Is the renewal of the strategic partnership only a business cooperation between Denmark and China? Nowadays, no one would consider in this way, except those enterprises ignore the all related to the human value but not include money.

Then what are the reasons drive Denmark to renew the strategic partnership with China?

#### 2.1 The confusion of the Ideology

2.1.1 The fundamental value of Denmark is democracy and freedom of speech, while the value system of current China is based on the autocracy of communism. Two values of opposite nature determine the difference in ideology.

In Danish social system, the function of politics serves business. Politicians are public servants voted by people.

2.1.2 But in communist China, all businesses serve the communist politics. Politicians are pointed by the communist leaders. In fact, they are the controllers of the national assets, but in the name of socialism.

2.1.3 In this case, while Danish politicians encounter Chinese politicians, all the successful business contribute the strengthening of the communist autocracy. The money earned from China improved the life conditions in Denmark but decline the life quality based on freedom.

#### 2.2 Orientation

2.2.1 When communist China applied to join World Trade Organisation (WTO), what they wanted is business benefit without duties - follow the WTO rules.

2.2.2 A lot of agencies, most of them are overseas students and scholars, have been sent out by the communist China to steal high tech knowledge and information from the partner countries, including Denmark.

2.2.3 Communist China uses economic coercion and unrestricted warfare to threaten its business partners when they did anything CCP not satisfied. This is obvious in Denmark.

Currently, the foreign policy of Denmark is money(business) orientation, especially in the relation with China.

Due to the ideology difference, in the bilateral ties of Denmark and China, money orientation policy of Denmark has already provided a good opportunity that the autocratic China can use this policy to suppress Denmark.

2.2.4 It results in a very brutal reality that the decline of Danish value right now is changing Denmark from democracy to an autocracy gradually in a very subtle way.

### **2.3 Knowledge of China's data (Index 5)**

2.3.1 Communist China is well known not only in fake news but also in data. In order to create political achievements, fake data has become a political tool of the CCP. While the western media reprint the news from China, it is doing a volunteer job to help the CCP to do the big propaganda.

2.3.2 "China (CCP) Statistics Bureau has been providing false data, more often for political needs", said Dr.Cheng Xiaonong, a Chinese scholar living in the United States.

2.3.3 Leland Miller, chairman and president of China Beige Book International, a New York research institution, once said that China's GDP data is not an economic language, but a political discourse.

2.3.4 WikiLeaks disclosed in 2010 that on March 12, 2007, CCP's Premier Li Keqiang, the CCP Secretary of the Liaoning Province, told the US ambassador about Liaoning's economic situation that China's GDP figures were "man-made" and therefore unreliable.

2.3.5 <What happened to China's GDP statistics?> is a book by Thomas G. Rawski, a professor of economics at the University of Pittsburgh, published in 2001. The book says, judging from China's energy consumption, transportation and construction material production, the actual growth rate of China's GDP from 1997 to 2000 was "half or more" than the official data.

2.3.6 According to experts, the population of China has decreased sharply to an estimate number of 6 hundred million - 8 hundred million during the covid pandemic. But the official number we can find is still 1.4 billion.

2.3.7 This means, besides the political corruption and putrescence, China market shrinks a lot and vastly. The output of the western investment in China can be negative. This is also the reason that the majority of the United States' firms do not see China as priority for investment.

## **2.4 Naiveness of the characteristic of the CCP**

2.4.1 Communist China is the only country that killed its own people on this planet. Killing has become one of the most essential ways for the CCP to maintain power.

2.4.2 Since 1949, the CCP has persecuted more than half the people in China. An estimated 60 million to 80 million people died from unnatural causes. This number exceeds the total number of deaths in both World Wars combined. (Index 6)

2.4.3 The harvesting of organs from executed prisoners in China started in 1984 when a law was implemented in China that allowed the practice. The public first became aware of this practice following the testimony of Dr. Wang Guoqi to the U.S. Congress in 2001. Worldwide, organ harvesting from executed prisoners is banned as unethical.

However, in 2006, first witnesses and then The Kilgour & Matas Report alleged that organs were harvested from living prisoners of conscience, mostly from detained Falun Gong practitioners.

The data suggests that organ procurement was "on demand" because organs were harvested without acceptable consent and the donors were killed in the process.

Although the authors conceded that they were unable to conclusively prove the allegations due to the restrictions on their investigation imposed by the Chinese government, The Kilgour & Matas Report nevertheless provides a critical amount of circumstantial evidence that systematic organ harvesting is indeed occurring in China. They sadly concluded that the allegations of systematic organ harvesting specifically targeting Falun Gong followers are true. Their report further notes that the government-sanctioned persecution of innocent victims as practiced by China represents a new form of evil in the world. (Index 7)

2.4.4 As a result, in the bilateral ties, what Denmark wants is business benefit, while what the communist China wants is the life of Denmark.

## PART THREE

### THE COMING THREAT AND LOST BECAUSE OF THE RENEWAL OF THE STRATEGIC PARTNERSHIP WITH CHINA

In the last hundred years, the sudden invasion by the communist spectre has created a force against nature and humanity, causing limitless agony and tragedy. It has also pushed civilisation to the brink of destruction. Having committed all sorts of atrocities that violate the Tao and oppose heaven and the earth, it has become an extremely malevolent force against the universe.

#### **3.1 The renewal of the Danish-Chinese Comprehensive Strategic Partnership will result in a short term economic interest but lost in a long run.**

3.1.1 Internationally, decoupling with communist China is happening. One track is that big companies more or less force their suppliers to move out of China. Another track is that they are actively moving the production out of China. Denmark is unable to survive if Danish big companies do not follow.

3.1.2 Most of the big international companies are already, moving their own production out of China. For example, The world largest consumer electronics company Sony had completely moved their production including OEM/ODM to Thailand. Apple is moving step by step to India and other countries. Headset headphone production has moved out first and i-phone production is moving partly.

3.1.3 Majority of the world big companies have been pushing their suppliers to move out of China. For example, Harman, the biggest audio company owning many big brands, e.g. JBL has more than 50% market share of BT speakers, it is also the biggest automotive audio system supplier to many big car manufacturers, is requesting their supplier to move to three countries: Vietnam, Mexico and Thailand.

3.1.4 Almost all the international consumer electronics companies have a strict China-plus-one requirement for their suppliers. That means the must-to-have conditions as a qualified supplier is to have one production site outside China.

3.1.5 It is obvious that companies mentioned above have been warned by their governments to start preparing the decoupling with China. So they will not run into

trouble if the government decides to decouple with China as a nationwide strategy and get strong reaction from China at that future time. As a result, if Danish government does not do the same, when all western governments finished the decoupling with China, an un-estimated loss will no doubt happen to the big Danish companies, losing the opportunity to seize the new market.

### **3.2 Denmark will lose trust from the democratic alliance geographically if the renewal of the Danish-Chinese Comprehensive Strategic Partnership is done.**

3.2.1 According to the news, Seagate fined \$300 million for shipping 7.4 million hard drives to Huawei. It is the largest standalone penalty ever issued by the Bureau of Industry and Security of the United States. This shows how firm the US governments is in decoupling from China. (Index 8)

3.2.2 Denmark's renewal of the strategic partnership with China is a counter wise action to the United States current policy to China, which means Denmark is not on the side of the United States and other allies.

### **3.3 If the renewal of the strategic partnership with China is done, it will make Denmark to become a remote province of the communist China, which means Danish people will naturally self censor just like Chinese people.**

3.3.1 Danish government will be shivering whenever Denmark does not satisfy the communist China's requirements in whatever way. Thus, freedom of speech, democracy might no longer exist.

3.3.2 Big Danish companies The final outcome of the Tibet case: The state attorney charged two midlevel officers of lying in court. Since then, the Tibet case has been silent. Copenhagen police compensated more than 100 demonstrators afterwards.

Denmark might become the servant of the communist China regime, treating Danish people just like the CCP does.

3.3.3 Denmark will still maintains its name but without any inner sense.

### **3.4 Intellectual property (IP) stealing done by communist China has been leading to huge losses from western countries including Denmark. If Denmark keeps being a**

**friend by renewing the strategic partnership with China, it means Denmark is willing to be cheated.**

3.4.1 One of the promises from communist China when entering the WTO was to stop IP violation nationwide massively in China after some time. But the CCP has done seriously to stop this. It is a CCP lying nature that they will only do things on the surface instead of increasing it to a moral level.

3.4.2 Denmark is also suffering from CCP IP stealing too. One example is the pre-bending wind blades avoiding the blades hitting the tower of the wind turbine in strong wind. The length of the blades are longer and longer. Many are more than 70 and even 80 meters long. The risk of the tip of the blades hitting the tower is high when the blades are pushed by the wind. LM wind power A/S had this patent and had been granted by China patent bureau. But after some time, they de-qualified the patent and gave it to a Chinese company claiming they invented this earlier. This lead to huge lost of LM wind power IP income since wind turbines are highly promoted by the Chinese government using subsidies and low interest rate loans to the companies.

3.4.3 Another example is the expensive technical software license IP violation in China. Taking computer simulation software as an example.

Communist China always do computer design, adjustment and virtual test using software instead of making actual prototypes. It normally cost half a million to several million DKK. It is very popular or even a default approach to use illegal licenses to do simulation in companies.

After it became a mainstream product development platform, they buy one license to cover up the legal challenge and use many illegal licenses. One may imagine how much the western countries lost for so many companies using illegal licenses in China. Simulation software is just one example. There are many industry examples like this. CCP never keeps their promises to stop stealing IP all over China.

## PART FOUR

### WHAT TO DO

**P**anel guests of the Kinesisk Salon from the United States and Taiwan provides unique views and practical examples to decouple from China without economic lost.

Economic dependence on China has become a powerful bullet for communist China to kill the western politics, to cause conflicts and divide the western alliance internally, to shake and then remove the western values. It is almost succeeded in changing the colour of the free west.

#### **4.1 Fighting back starts from the United States and the recognition of the *characteristic* of the CCP and *state security* have united the two big parties ever closely to work together to protect the United States.**

4.1.1 Select Committee on the Strategic Competition Between the United States and the Chinese Communist Party has been set up by the US government.

4.1.2 A long Entity List has been set by the US Commerce Dept to stop the investment in China, especially investment in the high-tech categories.

4.1.3 Security of the South China Sea has become an important issue of the western security. Geographically, the South China Sea is a commercial channel of the western economy. Taiwan is the throat of the South China Sea. If Taiwan was occupied by China, the commercial channel of the west could be cut off and the economic future of the west could be dark.

So, the United States prioritises the security of the South China Sea to protect Taiwan in order to protect the whole western economy channel.

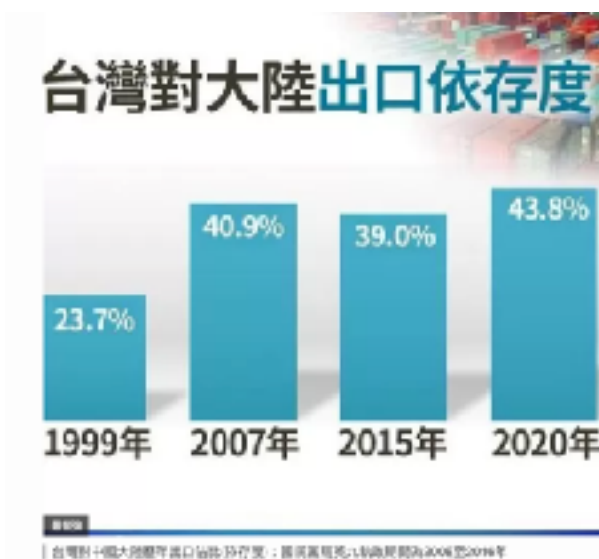

4.1.4 Culture warfare has been always effective during the WII and cold war time. Nowadays, it is the same. The United States pioneers as always in the culture warfare against communist China.

The enemy's enemy must be a friend. Shen Yun Performing Arts has become the top enemy of the communist China in the culture warfare, even though it has no political nor official background.

However, the US theatres unwittingly helped win the culture warfare with communist China by granting the venues to Shen Yun Performing Arts, including Carnegie Hall, The Kennedy Center Concert Hall.

**4.2 Taiwan has gained vast experiences of enhancing resilience against China's economic coercion and unrestricted warfare. To sum up, there are two important points, introduced by Dr. Jinhwa Zhang.**

4.2.1 Taiwan has been highly dependent on the Chinese market since 2000. Since 2018, due to the US-China trade war, pandemic lockdowns, and Taiwan's resistance against the CCP's united front warfare, CCP's economic coercion has been drastically increasing. However, Taiwan's exports to China ( mainly semi-conductor products) are still increasing.

(Taiwan's exports to China from 1999-2020)

August, 2022, Nancy Pelosi, the Speaker of the US House of Representatives, visited Taiwan. For this reason, Beijing threw a series of economic sanctions as retaliatory measures against Taiwan's more than 100 kinds of products.

4.2.2 The countermeasures of Taiwan are as below:

§1. To diversify market.

Under CCP's economic weapons, Taiwan government and industry have already raised their crisis awareness and began expanding diversified markets. Take the export of Pineapple as an example.

Export of pineapple to China in 2020 is 97%

Export of pineapple to China in 2022 is 13.7%, to Japan is 16.4%, to USA is 18.6%, to other countries is 51.3%

§2. Raising high-standard trade regulations and preparing to get international Trade Union membership.

§3. Aligning with democratic countries to jointly resist the autocratic tyranny.

§4. “Friend-shoring” supply chain framework.

The “Indo - Pacific Economic Framework” (IPEF) and the Taiwan-US 21st Century Trade Initiative are both based on certifying “friend-shoring”.

4.2.3 In order to resist economic threat and adhere to freedom and human rights, it is necessary to have the consensus of the society to jointly uphold the values of freedom, democracy, human dignity, and moral values.

While confronting CCP's Economic coercion as well as all kinds of “unlimited warfare”, Taiwan resists the bullying and persists to exhibit the performances of Shen Yun Performing Arts more than 30 shows every year. Shen Yun's performance tour in Taiwan has always been very successful with all full-house since 2006.

Former president and vice president, current president and vice president of Taiwan and other important politicians welcomed Shen Yun Performing Arts not only by congratulations but also went to watch the show.

This is because Taiwan and China before communism share the same roots and origins of the culture. Taiwan people can totally understand the traditional value that Shen Yun Performing Arts presents.

Shen Yun Performing Arts has a background of Falun Dafa, a spiritual practice of the universal principle of Truthfulness, Compassion and Forbearance. Taiwan people know it very well. Since Taiwan shares the same roots and origins of the Chinese traditional culture, besides mainland China, Taiwan owns the second large population of the Falun Dafa practitioners.

Not like Danish, Taiwan people never consider Falun Dafa as a sect because they know that is the demonisation of the CCP.

More than one hundred politicians welcome Shen Yun's performance tour in 2023.

Vice President Lai Ching-te, watched Shen Yun in April, 2023, Taipei, ROC (news screen shot)

However, the CCP tried multiple measures to obstruct the art performances everywhere. It shows that the dictatorship of communist totalitarian ideology and the aggressive infiltration to control freedom of expression all over the world.

In conclusion by Dr. Jinghwa Zhang, Taiwan's annual large-scale tour of Shen Yun Performing Arts enhances society's recognition and adherence to the values of freedom and humanity. This is the foundation of social resilience for a free society to resist autocratic coercion.

- End-
