ET AF UKRAINE'S MANGE BEHOV: RENT DRIKKEVAND

- Behov for rent og sikkert vand hos soldater og i krigsramte zoner
- Behov for lokal egenproduktion af rent og sikkert drikkevand
- Behov:
 - Lette at bruge
 - Lette at reparere
 - Lette at flytte fra sted til sted
 - Lokale operatører – kræver ikke special uddannelse
 - Vandkvalitet, der overgår, hvad der løber ud af danske vandhaner
- Mål: at bevare kamp-evnen hos soldater
- Mål: at kunne behandle krigsofre og sørge for hurtig rehabilitering
- Globalt er hver anden hospitalsindlagte, indlagt pga af urent drikkevand – og det kan løses og frigive kapacitet
