Following last year's great response to our Biogas PowerON 2023 with over 130 participants from 22+ countries we're announcing next edition, Biogas PowerON 2024, with great excitement. The conference will take place on 25-26 September 2024 in Copenhagen, Denmark.

In 2024, biogas continues to gain popularity amid the energy crisis and Europe's focus on energy independence and security. The coming years mark a crucial turning point for the robust development and scaling up biogas production. The green transformation ahead promises to enhance economic growth, security, and climate action for Europe and its partners. Initiatives like The Biomethane Industrial Partnership (BIP), launched on 28 September 2022, aim to support the EU's target of achieving 35 bcm annual sustainable biomethane production by 2023, laying the groundwork for a sustained ramp-up of biogas potential towards 2050. Biogas stands out as a cost-efficient solution to reduce imports of natural gas from Russia, requiring an estimated EUR 37 billion investment over the period.
